

AMPCNG ACQUIRES TRILLIUM CNG'S MINORITY INTEREST IN 17 COMPRESSED NATURAL GAS (CNG) FUELING STATIONS

Grant Zimmerman Named ampCNG Chief Executive Officer

CHICAGO – [ampCNG](#), a provider of compressed natural gas (CNG) infrastructure and fueling solutions for the heavy-duty commercial trucking industry, today announced that it now owns 100 percent of the 17 public access, high performance CNG fueling stations that were part of the joint venture between ampCNG and Trillium CNG™. All 17 stations will now operate under the name of ampCNG. The company also announced that Grant Zimmerman has been appointed chief executive officer. Zimmerman assumes the role from ampCNG co-founder Nate Laurell who will continue in his role as executive chairman of the board.

ampCNG's network of high performance, ultra fast-fill CNG fueling stations are strategically located across the U.S. on heavily traveled highway corridors, supporting some of the largest CNG fleets in the country with partners in the food and beverage, agriculture and dairy industries. ampCNG along with its parent company, AMP Americas, currently operates stations in Texas, in the Midwest (Indiana and Ohio), and in the Southeast (Florida, Georgia, Arkansas, North Carolina and Tennessee). New station projects are under development to expand ampCNG's footprint in Texas, Georgia, Illinois, Tennessee and California.

"This transaction further strengthens our commitment to advancing CNG fueling infrastructure throughout the country and to helping make the transition to CNG as easy as possible for heavy-duty trucking fleets," said Grant Zimmerman, CEO at ampCNG. "The collaboration with Trillium CNG enabled us to successfully grow our network of CNG stations, and we look forward to working together in our new independent capacities."

Zimmerman joined ampCNG in February, 2015, as senior vice-president of business development. Prior to ampCNG, Zimmerman was an associate principal at McKinsey & Company's energy consulting practice. Before McKinsey, Zimmerman worked at Enron in a variety of commercial and finance roles. He holds a BBA and MPA from the University of Texas at Austin and an MBA from University of Chicago's Booth School of Business.

"Over the past year Grant has played an integral part in helping us bring six new CNG stations into action," said Nate Laurell, chairman of the board. "His intensity and proven experience creating and sustaining growth in the energy sector make him the right person to lead ampCNG as we build on our achievements to offer even more natural gas fueling solutions."

About ampCNG:

ampCNG is leading the movement to help heavy-duty trucking fleets transition to cost-effective, clean and American produced compressed natural gas (CNG). Founded in 2011, ampCNG builds, owns and operates a growing network of CNG fueling stations, sells fuel and sources renewable natural gas for long-haul trucking fleets. ampCNG is a member of the [Department of Energy's National Clean Fleets Partnership](#) tasked to reduce the nation's dependency on imported oil. The company also operates the largest U.S. renewable natural-gas plant that produces fuel processed from agricultural waste. ampCNG's parent company is AMP Americas.
