#### Press Release – TEPPFA

Brussels, 09-12-2015

#### TEPPFA is Media Partner of ACI's conference '*Future of Polyolefins 2016*'

'*Future of Polyolefins 2016*', conference organized by ACI (Active Communications International), will be taking place in Amsterdam on January 20<sup>th</sup> and 21<sup>st</sup> 2016.

TEPPFA is glad to announce its participation in the role of media partner of the event. The conference will deal with updates on the global polyolefin market and its developments, as well as focusing on feedstock availability and sustainability challenges. The European Plastic Pipes and Fittings Association is particularly keen on this topic and its commitment is proved in the project "*Service Life of Polypropylene and Polyethylene Sewer Pipes*" conducted in 2 years together with LyondellBasell, Borealis and TGM ([Full Technical Report Here](#)).

Participants belonging from petrochemical companies, plastic converter, technology providers and other influential stakeholders among the value chain will come together to discuss a wide range of topics, such as:

- Feedstock Price Volatility
- European Focus: Adapting to Changes in the Global Market
- Key Regional Markets Analysis
- Correlation between Feedstock Availability & Resin Quality
- On-purpose Feedstock Production Technologies
- Polyolefin Applications – Trends & Prospects
- Pushing Plants to Their Limits – What is the Next Step?
- Latest Advancements in Polyolefin Production Technologies
- Sustainability of Specialty Polyolefins
