

CCTV/Unified Security Solution

CCTV

DC Rentals CCTV solutions provide options such as displaying live and recorded video, easy assignment of cameras via drag and drop, sophisticated split views and customized monitoring lay outs. Our solutions allow for the recording and playback of 128 HD PTZ cameras. Our CCTV systems also allow for iOS and android based mobile devices to remotely monitor live and recorded video.

Unified Security Solution

DC Rentals offers the construction of a custom-built command center to serve as a communications hub for events. In this center, there are live video feeds along with radio communications to enable event managers to dispatch personnel from a single location.

Video Analytics

Video analytical software allows for the restoration of CCTV footage. Used by such organizations as NYPD and the U.S. Secret Service, the software that DC Rentals employs enables event managers to recondition recorded footage for a variety of uses.

DC Rentals offers a variety of custom security solutions solutions for any application. Please [contact us](#) for to see how we can .
