

# MODFIRE

This is the original award-winning design that got it all started. Taking design cues from mod 1960s-futurist rocketships and industrial age smoke stacks, the Modfire is a perfect blend of style and function that compliments and elevates virtually any outdoor space, and at 4' tall, it can be packed up and transported to your favorite camping spots, if desired.

## FUEL TYPES

propane

natural gas

wood-burning\*
