

Thank you for submitting a sample of your product for consideration.

The Bloom Room Collective exclusively accepts medicine from legally qualified patients who are cultivating in accordance with California law. All the medicine at the Bloom Room Collective is tested for quality and potency by an independent third-party laboratory.

Because of the high volume of vendors, we are forced to turn down the vast majority of products. If the Buyer is interested in carrying your product, you will be contacted using the contact information you've provided on this form.

All edibles must meet the San Francisco Department of Public Health Medical Cannabis Edible Guidelines and must be individually pre-packaged accordingly. We prefer that all flowers be Lab Tested prior to entering the collective and that concentrates be individually pre-packaged in either gram or 1/2 gram increments.
