Re: 1,000 Gallon # 2 Fuel Oil Tank Removal Summary for 555 Milan Hill Road, Milan, NY

Dear Mr. & Mrs. Ozeri:

This letter will serve as a summary of our activities at the above noted site. A Photo Assay of the project is also provided.

On August 13th, 2011 Enviro Clean Services LLC (ECS) mobilized to the subject site to remove a 1,000 gallon #2 fuel oil, underground storage tank (UST). The tank was uncovered, cut open, pumped free of contents, excavated and removed from the tank pit. One 55 gallon drum of residual oil/tank bottoms were pumped off from the vessel for disposal. The tank was inspected and no holes or tears were evident in the walls or seams of the tank. A photo ionization detector (PID) was utilized to screen the soils within the tank pit for evidence of volatile organic compounds which are associated with petroleum contamination. No positive indications of petroleum contamination were observed. The tank was cleaned and scrapped.

Approximately 8 tons of clean fill was imported to the site to backfill the excavation and rough graded on site. ECS does not recommend any further action and the project is now considered complete.

Please retain a copy of this correspondence and attachments on file with the parcel in that it will serve to clarify any liability as to the disposition of the UST with respect to transfer of title to the premises.

Respectfully,

Chris Buck
