dear friends,

Sonya Dreves
President/
CEO

In 2015, CincySmiles focused on the future, and started looking into expanding and diversifying our programming. We wanted to sustain our momentum from 2014, continuing to answer the question on how do we serve more people? The opportunity for a large expansion came to us in 2015. The Ohio Department of Health announced they wanted to fund only one Dental OPTIONS program for the entire state of Ohio the one program selected was CincySmiles. This would be a huge shift for us, serving the entire state, forging new partnerships, and familiarizing ourselves with new providers. Although it was a daunting task, it was an exciting opportunity of which we were thrilled to be part.

Susan Laupola
Board Chair
of Trustees

The Dental Options program matches low-income residents in need of dental treatment with dentists who are willing to deeply discount or donate their services to that client. We provide the screening, eligibility, scheduling and follow up processes. We have over 900 dentists that participate in the program across the state of Ohio. We are excited to take on this challenge, to strengthen the core program while being innovative for the future, and most importantly to help people with access to dental care that will improve their quality of life.

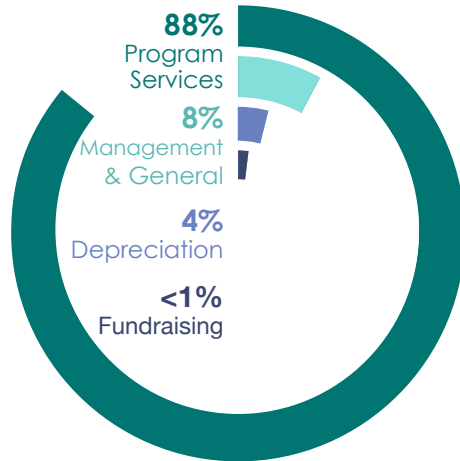

Thanks to our loyal donors, volunteers, supportive Board of Directors, and dedicated staff, we at CincySmiles are continuing to position ourselves to grow and serve more people, while being true to our mission. Thank you to everyone who has been a part of our success and to our future partners who will help contribute to making Greater Cincinnati a healthier community one smile at a time. We could not accomplish our goals without your support!

ohio & kentucky regional county map

OHIO & KENTUCKY REGIONAL COUNTY MAP

cincysmiles programs

Our four oral health programs serve residents in every county in Ohio and four counties in Kentucky.

The **Dental Sealant Teams** serve schools in six Greater Cincinnati counties. They target schools in which at least 50% of the student population qualifies for free or reduced lunches. The teams apply sealants to the molars of second and sixth graders. A retained dental sealant has been proven to be 100% effective at fighting decay. In 2015, CincySmiles' two Sealant Teams saw a combined total of **4,184 students**.

The **Dental Road Crew (DRC)** is a dental office on wheels. The staff consists of rotating dentists, a dental hygienist, and dental assistants. The DRC provides exams, fluoride treatments, dental sealants, fillings, root canals and extractions. The DRC also targets schools in the Cincinnati area in which at least 50% of the students are eligible for free or reduced school lunches. The DRC travels to high schools,

elementary schools and head starts in Cincinnati. **2,009 students** received treatment from the DRC in 2014.

McMicken Dental Center, established by CincySmiles Foundation in 2002, is located in Over-the-Rhine. McMicken provides dental treatment to the most at-risk populations of Greater Cincinnati. The Center is part of the McMicken Health Collaborative, which offers a range of professional health services, including medical, dental and mental health to the homeless and low-income populations in Greater Cincinnati. McMicken Dental Center is a seven-chair full service dental office that serves children and adults. In 2015, McMicken Dental Center provided **5,691 services** to those in need.

The **Dental OPTIONS/Donated Dental Services (DDS)** are innovative programs administrated by CincySmiles Foundation in the State of Ohio and Northern Kentucky. The program began in Cincinnati over 20 years ago, and in July 2015 CincySmiles Foundation was selected in 2015 to operate the Dental OPTIONS program statewide. The programs match low-income residents in need of dental treatment with dentists who are willing to donate or deeply discount their services. **3,270 residents** of Northern Kentucky and the State of Ohio received referral services or treatment through the Dental OPTIONS/DDS programs.
