Company Overview	KnowWho offers political contact information and profile data. Its primary function is to help advocacy organizations and lobbyists make contact and manage relationships with officials and elected representatives at the federal, state and local levels.		
Product/Service Description	<p>KnowWho Salesforce Directory Solutions is an umbrella offering, composed of a number of applications. A user first selects the desired dataset. From there, they can subscribe to any number of functional applications.</p> <p>What really sets KnowWho apart is its native integration into Salesforce. KnowWho data appears in Salesforce as if the user had entered it via the keyboard. This integration is important because it allows the Salesforce user to fully leverage the power of the Salesforce platform. KnowWho can thus deliver tremendous power and flexibility with substantially reduced development costs. But KnowWho goes far beyond simply providing contact information via the Salesforce platform. KnowWho can also map all of a clients' customers or contacts to Congressional districts, allowing users to easily leverage these relationships for lobbying or advocacy purposes, such as a letter writing campaign. It also provides powerful list building functionality. Applications include Map Wizard, Zip-to-District Matcher, and an innovative Lobbying Activity Tracker that helps lobbyists easily prepare government mandated disclosure reports.</p> <p>And of course all the standard Salesforce capabilities come into play as well. Lobbyists can keep contact notes on individual Congressional staffers, all of which roll up to the appropriate Congressperson. And when staffers move, KnowWho cleverly maintains these records so these relationships can be leveraged in the future. KnowWho's Salesforce Directory Solutions is a strong data product in and of itself, but by fully leveraging the Salesforce platform, it moves the product suite to a whole new level.</p>
