INSTRUCTIONS

We created a **Daily Chart** to help motivate your students to complete multiple lessons each day in CAPIT. Please print these charts and give them to your students. Explain to them that they should fill in one of the stars after completing a lesson. The goal is to ensure that your students complete multiple lessons each day.

You can double-check your students' daily progress and usage by logging into your Teacher Dashboard and limiting the filter (found on the bottom of the Teacher Dashboard) to that day's only. You will then see how many lessons your student completed that day.
