Docket # CP14-497-000

The Town of Roseboom hereby requests the Federal Energy Regulatory Commission to extend the official comment period for the Dominion Transmission, Inc. proposed New Market Project with an additional Public Scoping Hearing near the Brookman Corners expansion project.

Whereas, Dominion Transmission, Inc. has proposed a significant expansion of natural gas processing and transport facilities affecting large areas of our state via the proposed "New Market Project"; and

Whereas, the largest of the three proposed compressor stations would be located just to the north of Otsego County, at Brookman Corners in Montgomery County, only 12 miles from the Town of Roseboom's border; and

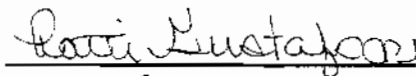

Whereas the continuous emissions of methane, benzene, toluene and other volatile organic compounds from this greatly expanded compressor station, powered by 18,500 hp engines, threatens the air quality of the Town of Roseboom and the health of its residents; and

Whereas, the Town of Roseboom has only recently found out about Dominion's plans for this compressor station expansion;

Therefore, the Town of Roseboom feels the single FERC public hearing in Georgetown, NY to be inadequate, considering the scope of the proposed project and its possible ill effects, and calls for an additional hearing in Montgomery or Otsego County, with an extension of the official time period for acceptance of public comments and concerns.

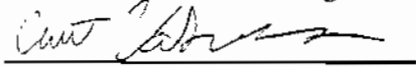

Furthermore, the Town of Roseboom taking into account this project's dimensions resulting in significant air pollution and other threats to public health, including explosion risks, considers the abbreviated Environmental Assessment (EA) to be inadequate and calls for a full Environmental Impact Statement (EIS) of Dominion Transmission's proposed "New Market Project."
