

Heartland Springs Naturally Pure Spring Water

Sometimes water drinkers are not aware nor told what is NOT in their drinking water

WHAT'S NOT IN OUR SPRING WATER?

NO Added Hydrofluorosilic Acid nor Added Sodium Fluoride

(Recognised by the *British Medical Research Council* as a developmental Neuro-toxin. This is commonly added to New Zealand's municipal water supplies). See our web site on page titled 'Auckland tap water'.

NO Added Chlorine or derivatives thereof

At levels tested, recent 2014 analytical results showed each of the following absent in our prime spring water:
See our web site - www.heartlandsprings.com - for levels tested.

NONE of THESE Heavy Metals or Poisons

NO Agrimony
NO Arsenic
NO Cadmium
NO Cobalt
NO Copper
NO Chromium
NO Heavalent Chromium
NO Cyanide
NO Iron
NO Lead
NO Mercury
NO Molybdenum
NO Nickel
NO Tin

WATER TESTS: See reverse of this page for what IS in our spring water.

Tested 3 times around 2002, our water has been re-tested multiple times in 2014-2015. Water tests have cost \$10,000+ to date, indicating importance to us of testing. Some testing will continue.

Tonkin & Taylor (environment & engineering consultants) took all 2014-15 water samples. International IANZ accredited Eurofins did most tests, while Hill Laboratories (also IANZ) did the others.

NONE of THESE Chemical Residues

NO Pentachlorophenol (PCP or PCF-organochlorine used in pesticides and wood)
NO Pesticide residue from the 24 Organochlorine Pesticides tested, NO DDT - see web site for exact tests
NO Oil or Grease

NONE of THESE Bacterial Contaminants

NO e-coli
NO Faecal Coliforms
NO Coliforms
NO Clostridium perfringens (type of bacteria not wanted in our food or water)
NO Enterococci (type of bacteria not wanted in our food or water)
NO Pseudomonas aeruginosa (type of bacteria not wanted in our food or water)
NO HPC (Heterotrophic Plate Count-indicates if some pathogens in drinking-water)

NO Nitrites

NO Sulphide

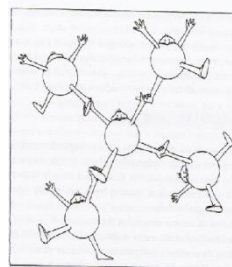

NO Suspended Solids

NO Tannin

NO Total Organic Carbon (TOC: Zero TOC is good indicator of high quality water)

Memory: scientists in France, Germany & Japan 'discovered' water has memory. Raw spring water which has never had pollutants (to remember), nor been pulverized by filtering or RO pressure treatments and the RO plastic membranes may be best to drink.

Some pictures of our water & some happy-dancing spring water molecules

In this simplistic drawing of water molecules the arms/hands are Hydrogen, feet/legs Electrons and body Oxygen! Alive, happy, raw water molecules LOVE to hold feet of another & free-style dance

Heartland Springs Water is like a beautiful ripe tasty fresh fruit on a tree - the ones ready to pick and eat – naturally.
