Analog Phone Interface

Quickly send audible notifications over existing paging systems for facility-wide communication

Using Alertus' advanced Text-to-Speech Technology, **the Alertus Analog Phone Interface allows organizations to send critical notifications to phone page groups and existing paging systems by connecting through legacy analog phone ports.**

Features

Configurable Alerting
Send emergency notifications to endpoints using a preconfigured paging extension.

Notification Coverage
Designed for large-area, high-occupancy facilities.

Secure
Connects to the Alertus Server through the Alert Beacon® for secure communication between phones and server.

Immediate Activation
Activate and cancel alerts directly from the Alertus Server.
