# Alertus
Activator App

Take the power of the Alertus Emergency Mass Notification System on the go. With the Alertus Activator App, authorized dispatchers can quickly activate emergency notifications – no matter where they're located – to faculty, students, staff, or personnel via their Android or iOS tablets or smartphones.

Activating On The Go

The Activator App is fully integrated with the Alertus suite of emergency notification solutions. It is designed to send alerts to an Alertus Recipient App user, a desktop, an Alertus Alert Beacon®, a VoIP phone, and more. Active alerts count will display across the app.

Customizable Preset Alerts

Bookmark your preferred presets on the Activation page to allow for quick activation. Customize the text, style, color, and icon for each preset in the server settings.

Simple Interface

Easily customize and send preset alerts. You can also use the swipe-to-cancel feature to view and cancel active alerts from the app dashboard.

Fully Synchronized

User rights and restrictions set within the Alertus Console automatically apply to the Alertus Activator App.

Easy Setup

The Alertus Activator App can configure the sign-up process based on your organization's needs. You will need one or more of the following for mobile app sign up and access: organization domain, email address, or pin code.

Accessibility/Ease of Use

Enjoy multilingual support, enhanced login credentials for a quicker login process, and tap functionality on hyperlink. launch links domain, email address, or pin code.
