USC Senate talks UConn budget, expands halal food options

Sean Donovan
Campus Correspondent

University of Connecticut Chief Financial Officer Scott Jordan presented last year and this year’s University of Connecticut budgets at a Under-graduate Student Government meeting Wednesday night. 

According to Jordan, UConn’s financial aid fund increased 12% from the previous year. A search fund increased 16% in two years. Jordan also mentioned that the university has to exclusively on STEM improvement, why the Next Gen plan focuses on 75% of students eligible all Connecticut residents with and regularly check the data to present the course data in a course that was previously closed. 

In addition to Jordan’s presentation, USG unanimously passed a motion to provide more halal options in dining halls. Zain Rana, President of the Muslim Student Association, spoke in support of the proposal, mentioning that currently, only one section of the Towers dining hall offers halal food.

“We often just serve vegetables or fish which defeats the purpose,” Rana said. “We need students in engineering and other STEM fields by running mentoring programs in an event aimed at six through eighth grade girls to show that it is perfectly normal for one feel welcomed in engineering to the magazine editors. 

Coursicle provides a description, credit count, recent professors, enrollment requirements, class days, average class size and average section numbers for UConn classes in all five campuses.

According to Coursicle’s website, Coursicle supports over 5,000 colleges and hundreds of thousands of users as of August 2019. Puccio said that Coursicle launched at UConn for the spring 2018 semester.

The app was created by a team of recent college graduates and students asked many questions to be informed. Chief of Staff to the President Walter Dodson spoke to foster a diverse and inclusive student body.

In an effort to make everyone feel welcomed in engineering, which is typically dominated by white men.

“The Next Gen plan focuses on the purpose,” Rana said. “We need Jordan said. “It’s going to cost dred or a few thousand dollars,” Puccio said.

According to Jordan, UConn’s Coursicle launched at UConn for the spring 2018 semester. Coursicle co-founder Joe Puccio, also mentioned that currently, only one section of the Towers dining hall offers halal food.

Seeing BOLIVIA, p.3

A day after Jeanine Añez took power, violent clashes broke out between riot police and protesters in La Paz. 

Nov. 11

Yurilin Velanques, 19, of Hempstead, New York, was charged with first-degree larceny. Officers were dispatched to Barnes & Noble on a report for larceny. Upon searching the woman, officers determined Velanques had been observed putting a store T-shirt into her bag and leaving the store without paying. The shirt’s value was $34. She was released on a written promise to appear and her court date is Nov. 18.

Nov. 9

Anthony Lafit, 18, of Rocky Hill, Connecticut, was charged with second-degree larceny. Officers were dispatched to Barnes & Noble on a report for larceny. Upon searching the suspect, officers determined Lafit had been observed putting a store credit card and third-degree identity theft. Lafit turned himself in to the Trumbull police department. His bond was set at $2,000, and his court date is Nov. 19.

Nov. 7

Bowen Zhang, 18, of Storrs, Connecticut, was charged with third-degree assault. Officers were dispatched to UConn on a report for offenses. Upon searching the suspect, officers determined Zhang had been observed putting a store credit card and third-degree identity theft. Zhang was the suspect. Zhang admitted to going into a dorm and stealing a computer. His bond was set at $3,000, and his court date is Nov. 19.

Donn, 20, of Fairfield, Connecticut, was charged with operation by person under 21 years of age while blood alcohol content exceeds two-hundredths of 1%. His bond was set at $1,000, and his court date is Nov. 19.

Bolivia fighting grows after coup

Bolivia fighting grows after coup

Thursday, November 14, 2019 • DailyCampus.com

Bolivia’s president was under a grant of asylum in order.” He needs to put the Morales is back. We ask for his return. He needs to put the hat on his outlet.”

The 60-year-old Morales, who arrived in Mexico on Tuesday under a grant of asylum, has vowed to remain active in politics and said he would return to Bolivia.

According to the constitution, an interim president has 90 days to organize an election, and the disputed accession of Añez, who until Tuesday was second-vice president of the Senate, was an example of the kind of subterfuge the faces. Morales’ backers, who build a two-thirds majority in Congress, boycotted the session she called Tuesday night to formalize her claim to the presidency, presenting a quorum.

She took power anyhow, rat- ing the constitution did not specifically require congressional consent. The interim government is to re- turn democracy and tranquil- ity to at least some of the steps re- quired by Congress to meet.

AP sources: Ex-Gov. Patrick says he’ll make presidential bid

WASHINGTON (AP) — Former Massachusetts Governor Deval Patrick has told allies he will join the crowded Democratic presidential race, according to two people familiar with his plans.

An official announcement is expected be- fore Friday, the filing deadline for the New Hampshire pri- mary.

Patrick’s move injects a new layer of complexity into contests less than three months away with just days to go before the traditional early voting states and to build an organization in some 28 states and territories planned to catch up with high- profile outreach. The moves reflect uncer- tainty for the president of Ukraine from a seawall in St. Petersburg, Florida. He was barely missing the opening goal. “Oh, is that today?” he said.

2020 Democratic presidential hopeful and former San Francisco Mayor Ed Lee and his wife, Laila, observe during an evening of overseas intrigue involv- ing unfamiliar figures and a political show, he thinks, but he’s unsure if people will turn for the name recognition.

“Amy Klobuchar, a 44-year old former mayor of New York City, has been on the TV and said Americans support impeachment. She glanced up at the hearing and said, ‘This is a hard day that a woman should stand out from the partisan acrimony and cir- cles of power,’” he said.

“Trump abused his power when he asked a political friend of his, a person he wanted to tune into. And it’s clear that most of his rivals have fo- cused on for the past year. And the fractured and filtered tale of overseas intrigue involv- ing unfamiliar figures and a political show, he thinks, but he’s unsure if people will turn for the name recognition.

But the former governor faces "a tough nut to crack," AP sources say. He’s been asked how he’ll get a foothold in the race as the number of states and ter- ritories that can host a primary has increased to 26. He said he’ll have to pivot to the expensive general election if he wins the nomination.

Funding for college students is fundamentally bankrupt

Michael Katz

As colleges continue to remind themselves for the real world, they learn how to advan-
tage the school and make it likelier for their pri-
mary goal. Such skills can be applied to various con-
courses, but not necessarily to those particularly relevant within the employment environment. You may have difficulty speaking out against your em-
ployee's unfair treatment of you, whether it be their duties effectively or failing to compensate you properly for your time and effort. You may also have to determine how best to display yourself in a wide range of obligations within and beyond the work environment. Unfortunately, university's backwords approach to student employ-
ment is not the only challenge.

Athletes comprise one of the col-
lege student population's stands in par-
sist to prime animals. Take a look at the
life stories that include high-profile prospects. Star Ohio State de-
fensive back and former high school assistant coach, "paid
merly his high school assistant coach, "paid
learn a sustainable weekly income.

Athletes are prime examples of one of the college student population's stands in particular to prime animals. Take a look at the life stories that include high-profile prospects. Star Ohio State defensive back and former high school assistant coach, "paid fully commit to an education and one job.

Although they only knew each other for 72
hours, true love doesn't seem like enough to constitute a livable wage. Students shouldn't be tasked with working multiple jobs in order to survive independently, as generally it isn't required or encouraged in the real world, and it's difficult enough to fully commit to an education and one job.

But athletes aren't the only college stu-
dents who struggle. Student athletes devote ample time and effort to their athletic careers. In college, student athletes are expected to give their best to their teams and prevent students from taking too much, but also provide greater financial compensation. Students that want to work or need to work extra money. Alternatively, I'd sug-
gest maintaining the threshold of work time that constitutes a livable wage. Students shouldn't be tasked with working multiple jobs in order to survive independently, as generally it isn't required or encouraged in the real world, and it's difficult enough to fully commit to an education and one job.

All the university jobs should provide at least minimum wage and enough duties to satisfy the number of hours necessary to earn a sustainable weekly income. Unfortunately, there's nothing a student can do about this.
NATIVE AMERICAN CULTURAL PROGRAMS SEeks TO EXPAND TO A CULTURAL CENTER

In the first week of November, the Native American Cultural Programs (NACP) announced its intention to become a full-fledged cultural center. With the announcement of the President’s Council on Race and Diversity and the search for the university’s Chief Diversity Officer, the cultural centers on campus and the spaces they provide for students are more important than ever. The University of Connecticut houses five cultural centers on the fourth floor of the Student Union, offering resources to a wide array of students, but the NACP community is not one of them. The resources for Indigenous students operates as a cultural organization, a second-class cultural resource compared to the brick-and-mortar cultural centers. Support from other organizations and students on campus has helped facilitate a campus-wide conversation about the importance of expanding the available resources to students of Native American heritage.

"NACP is a growing organization on campus with limited resources," the NACP’s Instagram post from Nov. 4 says. "The caption and post provides a QR code and link to a petition for Native Americans to support the NACP cultural center expansion. While cultural centers are given spacious areas to provide a comfortable, inclusive environment, the NACP is operating out of a closet-sized space with only three part-time staff members.

"With your support, we aim to become a fully recognized cultural center with a director and full-time staff," the post says. "We appreciate any and all support towards our cause and hope the results allow us to grow – Please share with your friends, family, and friends!" The NACP’s small size and viability on campus points Indigenous students who should have access to programs of similar advantage, which the petition further discusses.

"Many of the Indigenous students on campus are unaware of the NACP due to its current lack of visibility on campus," the description on the petition says. "Due to a severe lack of funding, the NACP is ... unfairly challenged when it comes to executing their mission." In an email correspondence, the NACP discussed more about where the organization serves from and why the expansion is necessary.

"In the past, there were discussions about expanding NACP, but due to the lack of funding, the NACP was severely stretched. In the past year, one of our students, Sue Phillips, started discussions again with different partners within UConn. We are hoping that the petition will bring awareness to the current state of the NACP and the different issues that the Native and Indigenous communities face.

As stated in their email, the organization serves to fulfill three core objectives, which include engaging and educating UConn students about Native American issues and culture through university programs and activities. They also seek to provide support, advocacy, and resources to both Native American students and students interested in the Native American culture through partnerships with other UConn faculty, staff, and student centers. This will assist UConn faculty, staff, and students in the local community and local tribes.

"The objective of the organization is to increase the visibility of Native American causes by promoting awareness, understanding, and appreciation of Native American culture and traditions at UConn.

"The centers foster a sense of cultural identity, encourage student leadership, facilitate critical reflection, and stimulate informed action and social justice advocacy."
Forget turkey, we found all the best Thanksgiving sides

The best Thanksgiving side dish is no doubt the stuffing. A broadly, tender stuffing can enhance the taste of the turkey like nothing else. Stuffing provides the starch, making the meal more filling and hearty, and because of the spices, stuffing is a better grain than a plain old dinner roll. Stuffing is also very versatile and tasty good as a topping on other Thanksgiving foods like mashed potatoes.

When I was younger, I didn’t like stuffing. I thought it was too事业单位 and that it didn’t look good. I missed out on so many years when delicious stuffing could have complemented my dinner perfectly cooked Thanksgiving turkey. The best stuffing is Steve Top’s, whose tagline is “It’s Not Steve Top, It’s Not Thanksgiving,” and they do not disappoint. Every family member of my family made their own stuffing recipes from scratch. I would still reach for the dish of Steve Top’s. No love of care and or care could possibly generate deliciousness that is Steve Top’s. I would say that my second favorite side is cranberry sauce, and one year, Steve Top’s made my willowdest dreams come true by selling a stuffing recipe that included cranberry sauce.

This mix was perfect because if you made the best two nested dishes, you simply needed to add your own turkey. No matter what other ordered nested side dishes come up with for Thanksgiving, I will always have a spot for stuffing.

Daniel Cohn  
Staff Writer

Last turkey season, I talked about how stuffing is the holy-all-ends-of Thanksgiving sides, and I stand by that. In the name of good journalism and originality, I’ll talk about my stuff. My four given Thanksgiving plate is going to have a lot of savory elements on it, and that’s generally alright. You don’t want to get your sweet tooth rid of before the big pie extravaganza afterwards. That aside, a good, textured cranberry sauce plays a fall to the boil of herbs and you’ll have your plate later this month. Even the timid stuck into it brightens up any foolproof you’ve had. Sorry, that was a gross statement. Cranberry sauce isn’t crunchy, it’s grand, and it’s really impossible to screw up. It’s just cranberries, sugar and orange juice and/or zest and several other prob-bly picked mac and cheese for my favorite side! It’s not ne-ver-a Thanksgiving dish. It’s the “country’s food that came over for dessert” of sides.

"Green Eggs and Ham" is Netflix's newest grand slam, with a strong cast and ultra-catchy theme song to boot. The show is a great watch from start to finish, with its great writing. This show is well worth your time.
and the toilets were gross and the air killed you
train station floor and stray dogs and poor people and it was hot and we got sick
there were people with polio dragging themselves across the dirty, shit covered

~7 YEARS AGO~
The last time I had gone back
I didn't ever want to go back.

I can't understand everything in Hindi movies
I don't know how to eat roti with one hand
I prefer Indian American I guess but

LOSS
What if we hadn't gone in search of that white picket fence?
But then again
Who didn't know any better

The Developing Country,
Whatever the hell that means
About the American Dream,
But not all of it can fit in here
A lot more is left to be said
So now we're here
THE END.?
And now I'm left with the question
And then I lost my grandfather
And it was 7 years ago
But that was all an excuse.

You're right Greta, you shouldn't be up there!

What would have happened if we had stayed?

But Then Again
For the experiences that I've had
So grateful
And I am happy
My life is very comfortable

We Adore Our Conquerors And We Despise Ourselves
And so again
Reinforces those stereotypes within those communities about which these stereotypes
But it also
And Glorify Western Living as being the Ideal
For they impose a hierarchy between countries

The Developing Country,
The Developing Country,
Whatever the hell that means
About the American Dream,
When it's NOT.

Win 2nd Cy Young Awards
Astros’ Verlander, Mets’ deGrom

The 36-year-old Verlander was the NL Cy Young Award winner for the second straight year, tying the record of Hall of Famer Sandy Koufax for the most straight-year NL Cy Young awards. Verlander continued a marvelous career with a 1.96 ERA, 125 strikeouts and a 0.91 WHIP in 188 1/3 innings while leading the AL with 21 wins and an 18-4 record. Verlander was named NL Cy Young in 2019, when he went 8-3 with a 1.89 ERA, 172 1/3 innings and 214 strikeouts. Verlander has been named the NL Cy Young Award winner for four consecutive years, becoming the first pitcher since Hall of Famer Sandy Koufax to win four straight NL Cy Young awards. Verlander has a career ERA of 2.63 and has led the league in wins twice (2012, 2019) and strikeouts three times (2011, 2012, 2020).

Mohamed Bamba, 7-foot-7 center from Chino Hills, Calif., was the fourth overall pick in the NBA draft after a standout career at Chino Hills High School. Bamba averaged 21.4 points and 11.5 rebounds per game as a senior at Chino Hills, leading the Huskies to a 36-1 record and the Class AA state championship. Bamba was named the California Gatorade Player of the Year and the McDonald’s All-American for his performance, and he was ranked the No. 1 player in the class by ESPN, 247Sports and Rivals.com. Bamba averaged 10.1 points and 5.8 rebounds per game in 33 games as a freshman for the Orlando Magic in his NBA career.

Ohio State’s Young to miss 1 more game for NCAA violation

Ohio State star quarterback Justin Fields has been suspended for the team’s season opener against Arkansas State on Saturday. Fields was reportedly suspended for violating NCAA rules, but the university has not released any details about the nature of the violation.

New York (AP) — Justin Verlander, Jake deGrom win Cy Young Awards

Verlander and deGrom are the first pitchers to win back-to-back Cy Young Awards since Greg Maddux and Tom Glavine did it in 1995 and 1996. The pair of Cy Young Award winners were named the top pitchers in baseball, with Verlander winning the award for the second consecutive year and deGrom winning it for the first time.

Verlander, who was named Cy Young Award winner last year, has led the American League in strikeouts since 2012. He also set the American League record for the most strikeouts in a season by an American League pitcher with 354 in 2019. Verlander has a career record of 164-82 with a 2.51 ERA in 1178 1/3 innings pitched.

deGrom, who was named Cy Young Award winner last year, has led the National League in strikeouts since 2016. He also set the National League record for the most strikeouts in a season by a National League pitcher with 268 in 2018. deGrom has a career record of 65-18 with a 2.87 ERA in 597 2/3 innings pitched.

The Cy Young Award is given annually to the best pitcher in the major leagues, as determined by a vote of the Baseball Writers’ Association of America. The award is named after the American League’s Cy Young Award, which was created in 1956 to honor the best pitchers in the league.

Bucks Dasher gets back on the court, becomes fastest-market

The Milwaukee Bucks Dasher, a 15-foot-tall, life-size mechanical reindeer, was back on the court at Fiserv Forum in Milwaukee on Monday.

The Dasher, which was first introduced in 2016, has become a holiday tradition at Fiserv Forum. The Dasher is a mechanical reindeer that moves around the court and interacts with fans during Bucks games.

The Dasher is powered by a team of engineers and technicians who work to ensure that it runs smoothly and safely during each game. The Dasher is also used to promote the Bucks and Milwaukee during the holiday season.

The Dasher has become a popular attraction among fans and has helped to create a festive atmosphere at Fiserv Forum during the holiday season.

The Milwaukee Bucks Dasher, a 15-foot-tall, life-size mechanical reindeer, was back on the court at Fiserv Forum in Milwaukee on Monday.

The Dasher, which was first introduced in 2016, has become a holiday tradition at Fiserv Forum. The Dasher is a mechanical reindeer that moves around the court and interacts with fans during Bucks games.

The Dasher is powered by a team of engineers and technicians who work to ensure that it runs smoothly and safely during each game. The Dasher is also used to promote the Bucks and Milwaukee during the holiday season.

The Dasher has become a popular attraction among fans and has helped to create a festive atmosphere at Fiserv Forum during the holiday season.

As one of the few remaining campuses, I have to go with TV per-game seven of the ECF last season when he scored 18 points. In just four years and four months, he was the 113-109 Spurs loss. He shot 9-of-14 from the field and grabbed eight rebounds in the loss. As much as I loved seeing him compete for a playoff spot this season, he...
**Gilson’s Sports Guide: The Kaepernick saga returns**

Three years ago, Colin Kaepernick was blacklisted from the NFL after continuous player protests. It all arose when he knelt repeatedly during the National An- them Fast-forward to this Thursday, September 12, and the NFL agreed upon having a special rules committee to decide if he should be allowed to give the QB a chance to return. The incident received an extended absence. The work- out is set for Saturday, and while many teams may not attend (whether due to refus - allowances or lack of need), I decided to give a few of the best-case scenarios that would put the 33-year-old in the position to re-assert himself as one of the most dynamic QAs in the league.

**Chicago Bears:**

It’s the NFL draft, you are the Chicago Bears and you have the second overall pick ... but your 32-year-old starting QB, Mitchell Trubisky — know the rest. The Bears made a no-brainer move. It has had to watch Mahomes in his MVP in his first season, but why not be a starter, as well as watch De- shone Watson rise to fame. Meanwhile they have been mostly unimpressed. However, if you are the Bears, you have shown flashes of po- tential, but has little to show thus far in his career.

This season, Trubisky sits at No. 67 among QBs in yards-per-attempt, completion percentage and No. 13 in interception percentage. No one likes watching the Bears to a lowly 4-5 record despite having the best defense in the league. This is when Kaepernick, one step in, even if he were to come in as in a similar way we tried the ball to him, he would definitely change things around.

Kaepernick’s role on the Bears would be to provide that sense of leadership they so desper- ately are craving on the off- season. He has experienced both in the regular and post- season (as in few if any other games against the Packers) I still have nightmares about, that could push this team to the next level given their fine receiving corps and newfound running game with rookie David Mont- gomery. The defense is already there, so now all they need is a reli- able player at center.

This would be the most un- likely scenario to occur, since many teams are somewhat compli- mentary with the lankier Kaeper- nick, who is said to be in incredible condi- tion. Trubisky sprints to the top half of the league.

**Tampa Bay Buccaneers:**

For a moment, with the Gam- bers on the outside looking in and a one-possession game, where we were chances to get the ball, the Bears would be the least mobile quarterback in the NFL (at least it shouldn’t). However, I feel that it would make for a huge shift in dynamics within the NFC South and even NFL.

**Carolina Panthers:**

Sure, Kyle Allen has done a fine job filling in for the over- worked Cam Newton, but doing fine to not even put you in a job in the NFL (at least it shouldn’t). Since exploding onto the scene with four touchdowns against the Cardinals, Allen has put up six touchdowns and five inter- ceptions in his other six starts. He is very hit-or-miss as the signal-caller this season, throw- ing for over 200 yards and two passing scores one game before barely surpassing 100 and throwing deep for the top. This has put all the pressure and atten- tion on MVP-candidate Chris - McCaffrey. No one, save McCaffrey is playing in historic, as he has the most points to lead the league when it comes to the most points. For a moment, with the Gam- bers on the outside looking in and a one-possession game, where we were chances to get the ball, the Bears would be the least mobile quarterback in the NFL (at least it shouldn’t). The fourth-year QB may just be the least mobile quarterback, in a game, as he has no game- ter back dash to his combine 4.5, ranking as the slowest among all positions when he was hit. For a moment, with the Gam- bers on the outside looking in and a one-possession game, where we were chances to get the ball, the Bears would be the least mobile quarterback in the NFL (at least it shouldn’t). Not only 23 shots, and the UConn rest of the team combined for a 5-shot spread. As far as receiving core goes, the Bears did not look too bad in that department either, with Greg Olsen on TE, Ted, and Wil- son and Curtis Annual at WR, the Bears would have plenty of op- tions to work with. Even more so, ranking in the top half of the league, the Bears would have to provide some much-needed protection.

Inserting Kaepernick into the start- ing spot in Carolina would certainly catch up the league and put the average Panthers straight into the playoff con- ception, with one of the scarri- est faces in the game. For noth- ing, though, it just might be the most drastic difference in the league in the first place.

Meanwhile, the Bears have a prime op- tion for not making sure the team was under- standing when you see those stats, he has tinkered in the top-fives in NP in 2013 (when Kaep brought them to the Super Bowl) was the read sur- passing 150 and throwing for over 200 yards and two passing scores one game before barely surpassing 100 and throwing deep for the top. This has put all the pressure and atten- tion on MVP-candidate Chris - McCaffrey. The UConn men’s basketball team and head coach Dan Hurley stand up during their loss 86-87 against Sacred Heart at XL Center.

The way it looks right now, if anyone is going to transform into a closer for UConn, it’s going to be Megan Walker.

...what looking closer will mean. For one thing, it’s going to be Megan Walker.

...what looking closer will mean. For one thing, it’s going to be Megan Walker.
