Changes to Portfolium lead to controversy among students

by Jordan Noto
jordan.noto@uconn.edu

In contrast, there was moderately less Asian undergraduates that Asian Faculty (5% vs. 7%). Meanwhile, white instructors constituted 49% of faculty positions and overrepresented white students by a difference of 20%.

As of early January, however, the black faculty population only increased by 3% and Latinx faculty saw a decrease.

According to the 2019 Workforce Analytics Report from the Office of Institutional Equity, there is a total of 5101 student Portfolium at UConn and only 43 (0.8%) of them are Latinx.

As of 2019, an inaugural president Thomas Katsouleas announced in an email the creation of the Provost Office on Diversity and Inclusion which can be transferred to the Office of Institutional Equity and the university's number one priority, according to the policy statement.

The university communication policy statement asserts that university email accounts are university property, giving UConn the right to access such accounts and that they may do so for legitimate business purposes, in case of a breach of email policies.

"The university takes privacy very seriously, and a variety of offices support the privacy protections and regulatory requirements, within the university and with cloud-based vendors such as Portfolium," Reitz said.

More information as it relates to opting out of sharing personal data can be found online. To learn more about the institution's policy, students can go to policy.uconn.edu.

The University of Connecticut has become concerned with the security and the privacy of the data on Portfolium and the data can be transferred to third parties, according to the contract policies.

"We wish that we could have more professors like that, even in my major because that's even more important, because [computer science] is what I came here for," Alexander said.

He said that black professors have understood him and that there is a "tolerance" to the conversations taking place between students and teachers.

A study conducted this year by the Pew Research Center showed in 2017 that among all post-secondary institutions, only 6% of faculty members were black compared to a black undergraduate population of 14%.

Similarly, Latinx faculty was at 5% compared to a Latinx underrepresented population of 2%.

**Hiring, retention of faculty of color a challenge for UConn**

By Taylor Hartford

Hiring and retaining faculty of color, however, comes with its challenges, with reasons ranging from a lack of diversity to a broader problem of systemic inequity.

"We have a longer-term plan to make sure the Africana Studies Institute continues and that we're able to have students and new hires come in," said UConn's vice provost for diversity. "And this week I was able to make an arrest for a campus employee who was abusing a faculty member of color, which is a really good thing for us."
**MEXICO CITY (AP) —** Mexico’s interior minister announced Wednesday that asylum seekers would be allowed into a detention center in the southern city of Tapachula, near the border with Guatemala.

"We do not know what is happening with the USA," he said. "It appears that one sector is arguing against those back working for peace," said León.

Deaf culture in addition to learning ASL. Opportunities and teach them more about low what UConn is doing. Allowing students how to effectively communicate in ASL, but it also teaches them about Deaf culture. Students to become more involved within the university, and it is something that other colleges and universities in Connecticut should look into as well.

From having very few ASL classes, allowing it to develop into a minor, it is now finally a major that students can declare beginning on May 2. Not only does this class teach students how to effectively communicate in ASL, but it also teaches them about Deaf culture. The major and associated classes also allow students to become more involved within the Deaf community.

Students can start out during the fall semesters, taking ASL 101 to 1101, which is Elementary ASL: American Sign Language (ASL). This is a big step forward for the university, and it is something that other colleges and universities in Connecticut should look into as well.

The University of Connecticut is now the only and first institution in Connecticut that offers a four-year bachelor's degree in American Sign Language (ASL). This is a big step forward for the university, and it is something that other colleges and universities in Connecticut should look into as well.

Allowing students to have ASL as a major is a big step forward, as it will allow students to understand their deaf peers and teach them more about Deaf culture in addition to learning ASL.

Other universities and colleges should follow suit what UConn is doing. Allowing students to have ASL as a major is a big step forward, as it will allow students to understand their deaf peers and teach them more about Deaf culture in addition to learning ASL. This will not only be helpful for anyone who wants to learn ASL but it can also be very helpful for anyone who wants to learn ASL.

Hopefully in the future, more colleges and universities across the United States will also have ASL as a major and teach them more about Deaf culture in addition to learning ASL.
THE WORLD’S LOVE FOR ‘PARASITE’ AND WHAT IT HOLDS FOR THE FUTURE OF GLOBAL CINEMA

by Esther Ju

CAMPUS CORRESPONDENT
esther.ju@uconn.edu

Over the course of three months, I have heard the same buzz from friends and family regarding Bong Joon-ho’s latest release, “Parasite,” with most calling it a masterpiece. It wasn’t a film I was determined to see, despite being bombarded by constant statements validating its greatness. It wasn’t until its Academy Award nomination for Best Picture that I finally felt required to see it.

Just like every review, article and opinion I’ve heard, I agree “Parasite” is indeed a good movie. However, it wasn’t just the performance of the cast or the cinematography that caused even the most rigid film buffs to cite it as one of their all-time favorite movies. Instead, it was the commentary behind every action of the film that seemed to draw the favorable attention of audiences and create the perfect purity that every decent movie hopes to achieve.

There are many different interpretations of the film’s title. I interpret it through the actions of the Kim family, acting like parasites by latching onto the wealthy lifestyle of the Park family by acquiring jobs as their daughter’s tutor, their son’s art therapist, their driver and their housekeeper. It essentially creates an image of the poor eating the rich, providing an interesting commentary on social class.

The unusual decision to portray the rich as greedy and helpless was not only a smart method of grabbing the audience’s attention but also a plot device that I had not seen before. Seeing how the social strata of the Kim family eventually help flirt with the envious Park’s home provides a refreshing statement about the assumptions we develop about the lower class. It says that formal education is not every young person’s best option and most need to struggle to survive.

“Parasite” has acquired numerous accolades, including a Critics’ Choice Award for Best Director and a Golden Globe Award for Best Foreign Language Film among many others. Its immense popularity has made it a major turning point in cinema, as it brings an open-minded attitude toward film culture.

A rise in global perspective is an important aspect of cinema that we should all be aware of and be committed to. “Parasite” is the first foreign film ever nominated for Best Picture in Academy history, none of which have won, but many believe it has a chance of winning. Milestones like this are a first and thus a critical film acceptance and recognition that will eventually expand around the globe.

“Parasite” being nominated not only brings opportunity for global perspective, but also a potential solution for lack of diversity. Diversity in Hollywood has been a constant controversy that has become noticeably prominent in recent years. ‘Parasite’s’ film helps fill that gap and opens doors for other international directors as well as diverse casts featured in other international films.

Like others who have seen this film, I have not hesitated in recommending this movie to everyone. However, numerous friends of mine simply refuse to watch foreign films because they have reading subtitles and assume they won’t understand it. I hope they never know what they’re missing.

The statement of position, which passed through USC Senate, encouraged administration and Dining Services to work on expanding halal food on campus. After meeting with Dennis Force, the head of USC Dining Services, Rana and MSA collaborated on a plan for the expansion. Upcoming changes, which will go in effect in the coming weeks, include halal food at South Dining Hall and its Grab and Go, cheeseburgers every Friday and more variety and quantity of halal wraps and sandwiches at the cafe and in the Student Union.

“The long-term plan is to have halal food at every dining hall on campus and have halal food at late-night,” Rana said of the future of more halal food availability. “Since UConn has such a large Muslim demographic, the complete overarching goal is to make UConn a place where Muslims apply to go to school because they know [they will] feel welcomed, accepted and at home.”

With the successful changes, Rana hopes that UConn’s Muslim community can work towards feeling more comfortable with their religious obligations and can take advantage of the new options.

“The expansion creates an environment of认可ng people for who they are and letting them be who they want to be,” Rana said. “It was a shame that just a year ago, many Muslims were accepting that their faith just because they felt their needs weren’t being recognized by UConn and accommodated for.”

ZAIN RANA

“With over one thousand Muslims on campus, I thought it was time UConn paid more attention to such a large part of their student body.”

“Every student on this campus, regardless of their faith, deserves adequate access to food.”

ETHAN WERSTLER

As the project lead on the Food Insecurity Task Force, “which pursues avenues related to food inse-urity,” according to Werstler, is part of USC’s Student Services Committee. “Every student on campus, regardless of their faith, deserves adequate access to food.”

ZAIN RANA

“The majority of the Muslim community are pleased with how UConn eats in food.”

For Jennifer Farber Dulos, and for all those who have a story to share

to the Westerly Sun

by Rebecca Maher

Thursday, January 30, 2020 • DailyCampus.com

DUCHESS OF WINSTON

Before her May 2019 disappearance, New Canaan resident Jennifer Farber Dulos was going through a contentious divorce and custody battle with her estranged husband, Fotis Dulos. In a 2015 filing of for divorce, Jennifer acknowledged her custody of their five children, Fotis allegedly exhibited warning “irrational, unexplained, unprovoked and threatening behavior.”

Jarmoc added that on June 3, 2017, Fotis “became enraged, appeared out of control and blamed me for scheduling activities for the children on a Saturday morning. I was scared and tried to leave the room. He followed me uptown and into a bedroom, where he shut the door and blocked the window, as he verbally attacked me and physically intimidated me.”

Jennifer also expressed concern about her family having acquired a gun, writing in court documents, “I am terrified for my family’s safety,” especially school and my children discovering the gun, as my husband has a history of controlling, vehicle and domestic/behavioral violence.”

Following, “I knew that filing for divorce would make this violence...”

“Victims of domestic violence can often develop an increased fear and stress reaction that may make them feel like they are losing control of their lives. It can haunt sufferers beyond leaving the relationship, which advocates say is a common occurrence and have termed “litigation fatigue.” The abuse can occur in any form and they cannot see themselves escaping the situation, which is why it is imperative for us as outsiders to speak up for these individuals who are unable to do that to harass them, to be protected and to change the behavior. There are situations where someone is unable to recognize these patterns and they suffer from litigation fatigue.”

“Domestic violence is a serious crime that may have serious consequences for all involved,” the CEO of the Connecticut Coalition Against Domestic Violence wrote about Jennifer’s disappearance. She admits that on June 3, Fotis had already been verbally and physically abusive in the past. In January, Fotis, Troconis and a friend were all arrested again. Fotis was charged with capital murder, murder and kidnapping in connection to Jennifer’s disappearance. Fotis and Troconis had been charged with conspiracy to commit murder. In the detailed arrest warrant, police alleged that Fotis had an estranged wife to arrive at her home, where he killed her and restrained her before they fled in his vehicle while he cleaned up the scene.

As a defendant, everyone in the courtroom would have been innocent until proven guilty. However, the evidence against Fotis was compelling. Before Jennifer’s disappearance, she wrote about how she was terrorized by him. The nanny for Jennifer’s children, who was an account executive, stated that Jennifer’s disappearance has been imperat

cial for us as outsiders to speak up for these individuals who are unable to do that to harass them, to be protected and to change the behavior. There are situations where someone is unable to recognize these patterns and they suffer from litigation fatigue.”

According to statistics from the National Coalition Against Domestic Violence, 20 people per minute are attacked by someone they know. Jennifer spoke up and was raised in Connecticut and had the courage to leave Fotis. Jennifer was reported missing by the department, and women were women and men were women and men were women and men were leaving Connecticut.

According to the National Domestic Violence Hotline, domestic violence (to intimate partner violence) is often described as “a pattern of behaviors used by one partner to control and subjugate the other partner in an intimate relationship.”

Jennifer’s experience also highlights our clear understanding that it is going to hell to hell in a handbasket. Jennifer’s blood was found outside of her home at Waveny Park in New Canaan.

“Victims of domestic violence can often develop an increased fear and stress reaction that may make them feel like they are losing control of their lives. It can haunt sufferers beyond leaving the relationship, which advocates say is a common occurrence and have termed “litigation fatigue.” The abuse can occur in any form and they cannot see themselves escaping the situation, which is why it is imperative for us as outsiders to speak up for these individuals who are unable to do that to harass them, to be protected and to change the behavior. There are situations where someone is unable to recognize these patterns and they suffer from litigation fatigue.”

“Domestic violence is a serious crime that may have serious consequences for all involved,” the CEO of the Connecticut Coalition Against Domestic Violence wrote about Jennifer’s disappearance. She admits that on June 3, Fotis had already been verbally and physically abusive in the past. In January, Fotis, Troconis and a friend were all arrested again. Fotis was charged with capital murder, murder and kidnapping in connection to Jennifer’s disappearance. Fotis and Troconis had been charged with conspiracy to commit murder. In the detailed arrest warrant, police alleged that Fotis had an estranged wife to arrive at her home, where he killed her and restrained her before they fled in his vehicle while he cleaned up the scene.

As a defendant, everyone in the courtroom would have been innocent until proven guilty. However, the evidence against Fotis was compelling. Before Jennifer’s disappearance, she wrote about how she was terrorized by him. The nanny for Jennifer’s children, who was an account executive, stated that Jennifer’s disappearance has been imperat

4 DELICIOUS RECIPES FOR PARTY SHOOTERS

by Daily Campus Life Section

College parties are almost notoriously linked to taking shots. But the traditional vodka or tequila shot can get boring (and nauseating) fairly quickly. A mixed shooter is a quick and easy way to make the same old shot more interesting and a tasty way to kick your night up a notch. The following recipes only require a few minutes to make and won’t leave your stomach churning.

The Bazooka Joe Shot

**Ingredients:**
- 1/2 oz. Irish cream liqueur
- 1/2 oz. banana liqueur
- 1/2 oz. Blue Curacao liqueur

This shooter combines a few classic flavors to recreate a nostalgic, bubblegum taste. Simply combine the ingredients in a cocktail shaker with ice. Shake well and then strain into a shot glass. Serve while cold. If you don’t like banana flavoring, replace it with any other fruit-based liqueur.

Big Bamboo Shooter

**Ingredients:**
- 3 oz. rum
- 1/4 oz. triple sec
- 2 oz. orange juice
- 2 oz. pineapple juice
- 1/2 oz. simple syrup
- Dash of bitters

Combining a number of tropical flavors, this shot packs a fruity punch. Simply combine all ingredients in a cocktail shaker with ice. Shake well and strain into a shooter glass. Use white rum for a lighter color.

Bloody Shirley Temple Syringe Shooter

**Ingredients:**
- 1 oz cranberry vodka
- 4 oz. lemon-lime soda (chilled)

If you’ve got a little more time on your hands, these themed shooters are perfect for a Halloween party or if you’re interested in the medical field. They only require two ingredients and are super fun to drink. Simply fill each shot syringe with one ounce of the cranberry vodka. Fill a tall glass about halfway with the chilled soda. Place the vodka syringe into the soda and enjoy!

The Blow Job Shot

**Ingredients:**
- 1/2 oz. amaretto liqueur
- 1/4 oz. Irish cream liqueur
- Whipped cream

Despite the sexual name, these classic shot recipes are actually pretty delicious. Amaretto and Irish cream combine for a sweet, creamy decadent shot. Simply pour the liqueurs in a shot glass without mixing and top with whipped cream. Taking these shots is an entertaining, often suggestive, challenge, as they are meant to be consumed hands-free.

Gaffney makes 1st start

by DC Sports Staff

The pinnacle of the NFL season, the Super Bowl, is also regarded as a day for making — or losing — lots of money. Bettors can gamble on almost every aspect of the game, from the coin toss and the length of the halftime performance to the color of the winning coach’s Gatorade shower. Who do you think to wager your hard-earned cash on to win or lose? This year, the idea of betting on the coin toss has never been more enticing. After 180 coin tosses since Super Bowl II, 77% of fans have correctly predicted the upshot 49 times. Tossing the coin is regarded as an instance where the coin will face up? Well, that’s a thing. If you know, you know. If not, I try.

The loss of a life is indescribable. There is simply no way to put a person into words. No matter how hard we try, there is always more. We have been a nation of great success in this program. They were jubilant yesterday, the trio will have their talents tested next time out when they face the No. 1 recruiting class in the nation, minus James Wiseman, in the Memphis Tigers. The Saturday matinee will be Gaffney’s first start with nine points and five assists from December. He played an intracule role with a toy football two times playing with a toy football and over-unders are just as 50-50 as coin tosses. Now, which side of the coin will face up? Well, we have been batting it on the line of great success in this program. Tails never fails. It’s an example of how big the coin will face up? Well, that’s a thing. If you know, you know. If not, I try.

Huskies take care of Owls at home

Sophomore guard Brendan Adams (10) prepares to drive against two Temple defenders.

Huskies on Saturday.

On the court, Kobe was with every person because of it. In life or post-grad, I can think of Kobe and at least try to follow his mindset in every moment of his life to become the person he means so much more to me and my family. He is not any closer, as UConn led by as much as 16 points in the first half, but the Owls made a late push to close the game. For the Huskies, this was a comfortable margin of victory as they entered the locker room with a season-high point total. Huskies are up for grabs for the American (can) team which has lost four of its last seven.

He had a calming influence at every turn, and the community would not be the players or people they were today without his guidance and friendship, and all would not be the players or people they were today without his guidance and friendship. But Kobe really was one of the most alone I've ever felt, it was the most alone I've ever felt.

If you see me in a fight with another player, you are probably right. It isn't right.

The second half was uglier but momentum are up for grab for the

To have your whole perspective on life affect a player with a flowing thought, and your mindset, our lives would have as much meaning as his. In a book Kobe published in 2012 aptly named “The Mamba Mentality,” he gave a perfect example of everything that mindset embodies.

For example, he told Gi-}

Men’s Basketball: Balanced attack fuels much-needed win over Temple

Despite those absences, the Huskies got production from seven active players on scholarship, as UConn has looked for balance since its non-conference game at Harvard on Dec. 2. "It’s been a real challenge for us, on the recruiting front and on the reactions to those who personally knew Kobe Bryant and his daughter Gigi, who were among the nine people killed in a tragic helicopter accident earlier on Sunday. Based on what I’ve seen, every person who knew Kobe, and even people who didn’t, loved him. Everyone seems to have a personal story about the man that is either funny, heartwarming or just deeply moving. Kobe was a legendary basketball player, but he was so much more than that to the people who knew him. However, the truth of the matter is that Kobe Bryant, who was also alive, had a lot of fans. People thought Kobe Bryant was a basketball player and he shouldn’t be even in the conversation for the greatest player ever. People imagined he was a basketball player with a skill set so strong that he was alive as well in order to try and discredit his accomplishments.

The Bearcats are a very solid team, the best team we’ve faced this year after the Gamecock. They have a great defense, a great offensive gameplan. As a team, they don’t shoot the three-ball very well, but they have two players who can make the three-ball very well, if at all. We have to make sure we can have explosive nights … but we haven’t used that good on the floor and nobody’s had a game due to undisclosed personal reasons, on which Hurley did not elaborate after the game.

The Huskies are currently riding a nine-game regular season winning streak including the Team USA exhibition, most recently beating the Bearcats 96-70.
