Building a Better Future in Ecuador

Juan Carlos lives in Rumikona where many children do not have the opportunity to develop their creative skills. Through focused attention, lesson plans and conversations at the Manna Library in Ecuador, we discovered that Juan Carlos is an innovative and artistic child who dreams of becoming an architect. With support, raw talent like Juan Carlos’ can grow into a career opportunity that will put food on the table for an entire family.

MPI’s Community Center and Library provide the tools community members need to take tangible steps out of poverty. Because of you, children like Juan Carlos have the ability to turn dreams into reality - and we are so thankful!

Will you provide life-changing support for Juan Carlos and children like him? Please help Manna meet our budgetary need of $40,000 to close the calendar year.

You can make a Holiday Gift of Hope here.
