

# LONGER WAYS TO GO

*Photographs by John Chiara*

Using hand-built cameras, the largest of which measures 96"×63"×106" and is transported on a trailer, John Chiara captures photographs directly on photographic paper, manipulating the exposure as the image appears.

His work will be on view this month at Pier 24 Photography, in San Francisco, as part of the exhibition *A Sense of Place*.

*John Chiara is based in San Francisco.*
