Ashdale Engineering is the UK's leading independent inspection company, providing statutory and other inspection and testing services since 1990.

- **Under PSSR 2000** - All types of pressure systems, compressed air/gas plant and receivers, Boilers, Steam Systems, refrigeration plant and all associated written scheme production.
- **Under LOLER 1998 and PUWER 1998** – Lifts (passenger and goods), overhead travelling cranes, dockside cranes, mobile plant, lifting plant, lifting machines, material handling systems and lifting accessories.

- **Under COSHH 2002** - Local Exhaust Ventilation system inspection (LEV) and the associated initial assessments.
- **Under PUWER 1998** - Industrial doors, Hangar doors, Fire hydrants, LPG systems, Industrial kitchen equipment.

All the inspection work is carried out under the Company's BS EN 9001:2008 (Quality Assurance) registration and ISO 17020:1998 (In-Service Inspection) accreditation.

We can go wherever you need us:

We have a specialist team of IRATA trained inspection engineers. All our engineers are confined space trained and occasional climber certified.

Our engineers are a minimum of SC level security cleared.

Like you, we focus on building relationships with our clients. We work around your needs to ensure that your clients' sites remain statutorily compliant, with inspections carried out on time and with the minimum amount of disruption.

Our engineers are all full-time permanent employees and come from a wide variety of industrial backgrounds. They include Chartered Engineers, ex British military personnel and industrial specialists. This wide range of specialism's and experience means that we understand the requirements of your industry and the sectors in which you operate.

Ashdale Engineering UK Ltd is a Type A UKAS inspection body. All our inspection services are carried out under our quality assurance registration (BS EN 9001:2008) and in-service inspection accreditation (ISO 17020:1998).

Our nationwide team of professional engineers cover every postcode in the U.K, with the capacity to work overseas wherever necessary.

We are experts in our field and have extensive experience of providing inspection services in a wide range of public and private sectors, including education, healthcare, leisure, manufacturing, utilities and property management.
