Please understand that if you are applying to this lab, we expect volunteers to complete **8-10 hours per week**. This can be in roles relating to data collection, data coding, participant recruitment, and maintenance tasks for day-to-day operations around the lab. With preference given to those that apply early in their undergrad studies and with a large volume of applicants, it is advisable to apply early and maintain a high GPA (3.2+). It is also advisable for students to remain with the lab for longer periods to gain more skills (with good performance).
