

Long Range Roller Detect Switch

This long range proximity switch will detect the roller assembly helping to eliminate roller jamming.

Mount with Supplied mounting bracket and 4 screws to existing take up slide carriage.

Metal from Roller needs to pass approx. 1"-1.5" (25mm-40mm) from switch

Wire as follows;

Terminal

- | | |
|---|---|
| 1 | 24 VDC (Supply power) |
| 2 | 0 VDC (Supply Power) |
| 3 | not used |
| 4 | Detect input (Washlink equipment controller input 36) |
| 5 | not used |

*If hooking up to a non Washlink Systems Equipment Controller, refer to wiring diagram on switch.
