~ means the stock is approximate

Stock: how many units are available for purchase

Unit: the smallest division that can be purchase (this is determined by the division ordered from the merchant. If split more, prices would be more confusing)

Pack: how many of the item received per unit

Price: the value of one stock in Points

**If you would like to purchase something, or if you have a request for an item, email anyone on ICC**

Price is determined as market value from merchant, then rounded up to the nearest whole dollar. If it is an older item, price is reduced.

1 Point = 1 Dollar

**If you find an error, please leave a comment (upper left-hand corner) or email aryadee72@gmail.com**

If you don't understand, please email aryadee72@gmail.com and/or visit this link:

[ICC Funding and You Slideshow](#)

EXAMPLE:

I purchase 2 units of Hi-Chews for 28 Points. That means I would receive 2 cases, each with 10 bars in them.
