1. What are your expectations of ESK, how can we help you with this trailer?

2. Will this trailer be mobile (road worthy), or planted in one spot (single location)?

3. What is your desired layout?

(i.e. What type of spaces do you want defined, and where do you want them located? Bedroom in back, wet bath vs having the toilet and shower split up, long side kitchen etc. Some want a bigger bedroom and less cooking space, while others find entertaining in a larger livingroom / kitchen area priority with less focus on the sleeping quarters.)

4. How many people will be sleeping inside?

(Remember to account for guests if you want that option)

5. List the appliances/ furnishings that you would like included.

(i.e. Fridge, Stove, Other Appliances Built-in, Fold-out Beds, Heater.. Attach sheet/links if needed)

6. Are there any special features you want included?

(i.e. Solar Power, Awning, Heated floors, Specific Materials, etc)

7. Do you want a polished exterior?

8. What are your wishlist items?

(They may not fit the budget now, but we can only prepare for some features to be installed later if we know about them in advance. I.e. Solar panels need certain wiring done when the interior skins are off, to be added immediately or in the future.)

9. Do you currently own a trailer? If yes, what is your trailer's model / size / year / name?

If no, what is your desired trailer type, model, size, year?

10. Do you have any questions for us?
