

# CPE PROGRAMS TORONTO

Clinical Pastoral Education Programs  
CASC Supervisors of the Greater Toronto Area

CASC Member

## BENEFITS OF CPE TRAINING

Develop self-awareness and counseling skills to address multi-faith spiritual needs. Learn how to address mental health issues including depression and anxiety. Explore ways to support people through the process of grief, death and dying. Develop leadership skills in a variety of contexts. Learn how to conduct a spiritual assessment and a spiritual care plan. Experience being part of a multi-disciplinary clinical team.

A recent study showed that 49% of hospital patients felt that their own clergy did not adequately support their religious and spiritual needs while in hospital (Balboni et al, Journal of Clinical Oncology, 2007)

Don't be one of them! Learn the skills necessary to assist your congregants, clients and patients in times of crisis.

## CPE COURSES

Clinical Pastoral Education (CPE) opportunities have increased in the GTA over the last year. There are both full time and part time programs offered on a continuous basis. We invite you to apply for what many students call a "transformative" learning experience. CPE is well suited for those considering parish, congregational, community or institutional ministries.

Please visit [www.cpe-toronto.ca](http://www.cpe-toronto.ca) for course details and upcoming deadlines.

We look forward to meeting and working with you!
