Lexington Medical Center is a 414-bed modern medical complex that anchors a comprehensive health care network.

At Lexington Medical Center, a steady rate of growth has transcended troubled times, and expectations of excellence continue to support our strengths as an employer, community member and vital resource for physician practices and other health care businesses.

Only the level of support our physicians receive equals the market advantage they enjoy. Lexington Medical Center’s advanced health care network is designed to complement the growing health care industry.

It is worth noting that behind the outstanding services, existing programs and state-of-the-art facilities that comprise Lexington Medical Center’s Network of Care is a wealth of incredibly dedicated people, who combine exemplary skills and talents as members of our staff, volunteer roster and auxiliary organization.

Lexington Medical Center is proud to boast that our employees’ job satisfaction is reflected in high numbers of years of service and extremely low turnover, accompanied by an overarching willingness to excel in patient satisfaction and outcomes, and a full commitment to community service throughout and well beyond our campus. At Lexington Medical Center, the highest caliber people are ready to work with you to ensure your success.

**OUR MISSION:**

*To provide quality health services that meet the needs of our community.*
Beyond the hospital’s emergency care facilities at the main campus, Lexington Medical Center has a network of care, including six community medical centers.

Strategically located throughout Lexington County, our community medical centers provide urgent care and a wide variety of outpatient services with close-to-home convenience. Patients benefit from convenient access to high quality care, and those with emergent needs can be easily transferred to the hospital’s state-of-the-art Emergency department.

In addition to our community medical and urgent care centers, we offer an occupational health center, the largest extended care facility in the Carolinas, an Alzheimer’s care center, and cardiovascular and oncology programs affiliated with Duke Medicine. Physician practices extend the Lexington Medical Center Network of Care from within their offices, a collective embrace of successful growth through teamwork.
Lexington Medical Center’s Radiology department offers a full range of diagnostic radiology services.

These services include CT scanning, ultrasound, magnetic resonance imaging (MRI), fluoroscopy, diagnostic X-ray, bone density and digital mammography. Inside its Emergency department, the hospital operates three diagnostic imaging rooms, which are positioned directly between the Radiology and Emergency departments.

State-of-the-art digital imaging technology linked to secure picture archiving and communication system lets physicians access, analyze and send highly detailed images.
Lexington Medical Center has the largest established physician network in the area with 288 physicians and 70 nurse practitioners, physician assistants and certified nurse midwives at 73 locations.

PHYSICIAN NETWORK

Lexington Medical Center has a long history of expertise in physician employment.

Our large physician network encompasses hospital-based, practice-based physicians and specialists who cover everything from general medicine to pediatrics, internal medicine to obstetrics and gynecology to bariatric surgery. These doctors are among the finest health care providers in the Southeast.

The physician network is also armed with state-of-the-art technology to provide doctors with the best tools to help their patients, backed by quality services and support from every involved department. Lexington Medical Center clinicians lead the way in using the most advanced technology available in their specialties.
Providing quality health services that meet the needs of our community.
