Material Name: Hydrocarbon Resin
NEVCHEM® 240 Resin

* * *Section 1 – PRODUCT IDENTIFICATION* * *

Material Name:
Hydrocarbon Resin

Trade Name:
NEVCHEM® 240 Resin

Recommended Uses of Product and Restrictions
Identified Uses: Adhesives, coatings, rubber, inks
Uses Advised Against: None Known

Manufacturer Information
Neville Chemical Company
2800 Neville Road
Pittsburgh, PA 15225-1496
Phone: 412-331-4200
Emergency Phone #: 412-331-4200 or CHEMTREC at 800-424-9300
Fax: 412-777-4234

* * *Section 2 - HAZARD(S) IDENTIFICATION* * *

Classification in accordance with 29 CFR 1910.1200
Combustible Dust

GHS LABEL ELEMENTS
Symbol(s)
None needed according to classification criteria.

Signal Word
WARNING

Hazard Statement(s)
May form combustible dust concentrations in air

Precautionary Statement(s)

Prevention
None needed according to classification criteria.

Response
None needed according to classification criteria.
Material Name: Hydrocarbon Resin
NEVCHEM® 240 Resin

Storage
None needed according to classification criteria.

Disposal
Dispose in accordance with all applicable regulations.

Component Related Regulatory Information
This product may be regulated, have exposure limits or other information identified as the following: Naphtha, Contaminants:
Naphthalene (91-20-3) is contained in most of our raw materials as a non reactive non intentional material. It has a relatively high boiling temperature (218 degrees C.) and has a great affinity for petroleum hydrocarbon resins and thus is very difficult to remove completely from the resins. This product typically contains less than 500 parts per million of naphthalene.

### **Section 4 - FIRST-AID MEASURES**

**Description of Necessary Measures**

**Inhalation**
If adverse effects occur, remove to uncontaminated area. Give artificial respiration if not breathing. Get immediate medical attention.

**Skin Contact**
Wash skin with soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get immediate medical attention, if needed. Thoroughly clean and dry contaminated clothing before reuse.

**Eye Contact**
Flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

**Ingestion**
Call a Poison Center or doctor/physician if you feel unwell. Rinse mouth.
Most Important Symptoms/Effects

Acute
- Mild skin irritation.

Delayed
- No information on significant adverse effects.

Indication of Immediate Medical Attention and Special Treatment Needed, If Needed
- Provide general supportive measures and treat symptomatically.

---

**Section 5 - FIRE-FIGHTING MEASURES**

Suitable Extinguishing Media
- Dry chemical, carbon dioxide, foam, water spray

Unsuitable Extinguishing Media
- Do not use high-pressure water streams.

Special Hazard Arising from the Chemical

WARNING!
- Handling this material may create combustible dust which may be hazardous when finely divided and suspended in air. Combustible dust clouds can explode with destructive forces if ignited. Combustible dust clouds can be ignited by all common ignition sources including static electricity. Follow recognized grounding and bonding procedures. Keep away from heat, hot surfaces, sparks and open flame. Use with adequate ventilation. Minimize dust accumulation on surfaces.

Fire Fighting Measures
- Keep away from sources of ignition - No smoking. Avoid inhalation of material or combustion by-products. Move material from fire area if it can be done without risk. Use extinguishing agents appropriate for surrounding fire. Dike for later disposal. Stay upwind and keep out of low areas.

Special Protective Equipment and Precautions for Firefighters
- Wear full protective fire fighting gear including self contained breathing apparatus (SCBA) for protection against possible exposure.

---

**Section 6 - ACCIDENTAL RELEASE MEASURES**

Personal Precautions, Protective Equipment and Emergency Procedures
- Wear appropriate personal protective equipment recommended in Section 8 of the MSDS. Keep unnecessary people away, isolate hazard area and deny entry. Avoid contact with skin and eyes. Avoid release to the environment. Only personnel trained for the hazards of this material should perform clean up and disposal.
Methods and Materials for Containment and Cleaning Up

Avoid generating dust. Use non-sparking tools and equipment. Keep unnecessary people away, isolate hazard area and deny entry. Absorb with sand or other non-combustible material. Keep out of water supplies and sewers. Collect spilled material in appropriate container for disposal. Do not allow to enter into ground-water, surface water or drains.

Environmental Precautions

Avoid generating dust. Avoid release to the environment.

**Section 7 - HANDLING AND STORAGE**

Precautions for Safe Handling

Do not handle until all safety precautions have been read and understood. Keep away from all ignition sources. Do not breathe dust. Use methods to minimize dust. Avoid contact with skin and eyes. Do not eat, drink, or smoke when using this product. Always wear recommended personal protective equipment. Wear personal protective clothing and equipment, see Section 8. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Take precautionary measures against static discharge. Dissipate static electricity during transfer by earthing (grounding and bonding) containers and equipment.

Conditions for Safe Storage, including any Incompatibilities

Store in a cool, dry place. Store in a well-ventilated area. Avoid contact with molten material. Keep separated from incompatible substances. Keep container tightly closed. Empty containers may contain product residue. Do not reuse empty containers without commercial cleaning or reconditioning. Store and handle in accordance with all current regulations and standards.

Incompatibilities: strong oxidizing materials

Biological limit value
There are no biological limit values for any of this product's components.

Appropriate Engineering Controls
Ventilation equipment should be explosion-resistant if explosive concentrations of material are present. Provide local exhaust ventilation system. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen-deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Use only appropriately classified electrical equipment and powered industrial trucks.

Individual Protection Measures, such as Personal Protective Equipment

Eyes/Face Protection
Wear splash resistant safety goggles with a face shield.

Skin Protection
Wear appropriate chemical resistant clothing.

Glove Recommendations
Wear appropriate chemical resistant gloves. Recommended material: cotton, leather, rubber, neoprene.

Respiratory Protection
A NIOSH approved respirator with organic vapor cartridges and N95 filters may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits, or when symptoms have been observed that are indicative of overexposure.

**Section 10 - STABILITY AND REACTIVITY**

Reactivity
None known.

Chemical Stability
Stable at normal temperatures and pressure.

Possibility of Hazardous Reactions
Hazardous polymerization will not occur.

Conditions to Avoid
Avoid heat, flames, sparks and other sources of ignition. Avoid contact with incompatible materials.

Incompatible Materials
Oxidizing materials, combustible materials

Hazardous decomposition products
Oxides of carbon, carbon monoxide, hydrocarbons
**Section 11 - TOXICOLOGICAL INFORMATION**

### Acute and Chronic Toxicity

#### Component Analysis - LD50/LC50

The components of this material have been reviewed in various sources and the following selected endpoints are published:

**Naphthalene (91-20-3)**

- Oral LD50 Rat 1110 mg/kg
- Dermal LD50 Rabbit 1120 mg/kg
- Inhalation LC50 Rat >340 mg/m³ 1 h

#### Information on Likely Routes of Exposure

**Inhalation**

Inhalation of dust may irritate upper respiratory tract

**Ingestion**

No information on significant adverse effects.

**Skin Contact**

May cause irritation

**Eye Contact**

Causes eye irritation

**Immediate Effects**

No information on significant adverse effects.

**Delayed Effects**

No information on significant adverse effects.

**Medical Conditions Aggravated by Exposure**

No information on significant adverse effects.

**Irritation/Corrosivity Data**

- Eye irritation; Mild skin irritation

**Respiratory Sensitization**

No data available.

**Dermal Sensitization**

No data available.

**Germ Cell Mutagenicity**

No data available.

Canada Regulations

This product has been classified in accordance with the criteria of the Controlled Products Regulations (CPR) and the SDS contains all of the information required by the CPR.

Canadian WHMIS Ingredient Disclosure List (IDL)

Components of this material have been checked against the Canadian WHMIS Ingredients Disclosure List. The List is composed of chemicals which must be identified on SDSs if they are included in products which meet WHMIS criteria specified in the Controlled Products Regulations and are present above the threshold limits listed on the IDL:
