

Looking for a way to increase sales? Do you want to capture more market share? Then check out Cebu Stone thin block veneer products.

Cebu Stone is a cost effective, lightweight, and durable thin block veneer. Cebu Stone combines classic aesthetics with ease of installation for both new construction and remodel projects.

Your contractor customers will marvel at Cebu Stone's labor savings and installation rates which are several times faster than traditional masonry systems. Cebu Stone incorporates an exclusive AccuTab Set System that provides an efficient and accurate installation with its cast in place tab that produces a built-in mortar joint. Cebu Stone is typically painted following installation, but can also be manufactured with integral color.

Cebu Stone manufactures a full line of thin concrete masonry veneer units, including corner blocks and trim pieces. Adequate inventory is available for your stock and to quickly supply your customers' project needs. Design options are limitless.

Cebu Stone can be used over, or in conjunction with, the following substrates:

- masonry surfaces (tilt up, CMU)
- wood framing
- metal studs
- combined substrate overlaps (masonry adjoining framing)

Cebu Stone has been successfully installed on many projects including fast food chain stores, national car care service stations, strip mall shopping centers, and industrial and light use commercial buildings.
