

135watt solar panel

135W SPECTRA

This 135watt solar panel delivers power during the day to either one or up to 4 x 24watt REDi-lite lights.

Total combined light wattage not to exceed 96watts.

This system works much the same as a skylight with a sun up sun down effect. Once the sun goes down the lights will be off.

*An optional Day/Night kit is available for night time use.
