

250 Watt SPECTRA

250 Watt Solar Panel

A 135 watt solar panel delivers power during the day to either 8 x 24 watt LED lights.

#Total combined light wattage not to exceed 192 watts.

This system works much the same as a skylight with a sun up sun down effect. Once the sun goes down the light will be off.

*An optional Day/Night kit is available for night time use.

Up to a max of 8 x 24w lights
Or 32 x 6w lights
