

Advanced POOL COATINGS

Why Should You Consider *Advanced-Glass* for your Pool Surface?

Advanced-Glass is the most comfortable and easy-to-maintain pool surface available. **Advanced-Glass** can be applied to any pool surface, including plaster, pebble, concrete, vinyl liner pools and pre-fabricated fiberglass pools. It is especially effective against cracks, leaks and algae. Advanced Pool Coatings has set the standard in **Advanced-Glass** fiberglass resurfacing. We have re-surfaced thousands of pools throughout California, Nevada and Washington. Below are listed some of the features of our exclusive **Advanced-Glass** system.

Pool Conditions	Plaster	<i>Advanced-Glass</i>
Rough Surfaces	As plaster wears, roughness increases.	Always smooth with our exclusive “orange peel texture” surface. No scratched feet and toes.
Structural Cracks	Any substantial pool movement can cause cracks and leaks.	Adds structural strength to pool shell. Prevents leaking.
Blemishes - Stains	Little resistance to stains and blemishes even if surface has been recently applied.	Resistance to stains with easily cleaned surface.
Algae Resistance	Algae adheres to porous surface.	Smooth, dense, non-porous surface prevents algae from adhering.
Attractiveness	Unightly when stained/deteriorated	Maintains attractive appearance throughout its long life. Ages gracefully.
Durability	Depends on application. Re-plastering often separates from original surface (poor adhesion). Material limitations reduce the durability of plaster.	<i>Advanced-Glass</i> will bond to underlying surface, as properly applied by Advanced Pool Coatings – we guarantee it! The superior corrosion resistant and inert properties of <i>Advanced-Glass</i> ensure exceptional durability.
Water chemistry	Very sensitive to incorrect water chemistry. Plaster surface easily compromised	Inert surface less sensitive to out-of-balance water chemistry.
Life Expectancy	Varies. Depends on water chemistry, maintenance program, plaster mix, and application technique.	Exceeds that of plaster when properly applied by Advanced Pool Coatings. Ask any of our customers (see map of completed jobs on www.advancedpoolcoatings.com).
Start-up	Complicated. Requires brushing and attention.	Simple. No brushing needed. Allow to cure, then start-up.
