Office of the Maricopa County
School Superintendent

STEM RESOURCE CENTER

Provides a variety of free resources to teachers that inspire creative ways to teach science, technology, engineering and math in the classroom. The center is available for teachers of all grade levels and school types by appointment only or administrators can arrange custom group visits.

To request information or to schedule a session at the STEM Resource Center, visit our website schoolsup.org/stem

Teacher Collaboration

Teachers share creative ideas on developing STEM-related activities and lesson plans.

Teachers inspire one another to use items in a nontraditional way to teach STEM-related concepts in the classroom.

STEM experts will be on-hand to facilitate development of ideas.

Free STEM Resources

Teachers select free resources that can be disassembled or used as-is in classroom projects.

Items are donated from local businesses and have included solar lighting, headphones, R/C vehicles, cameras and more.

Teachers will receive a designated bag and may fill it with any items that fit inside.
