SATellite Symposia Programme

Sunday 2 July | La Cité Nantes Congress Centre | Room 300

SATellite 1

EPA and DHA Omega-3s: Making Sense of Controversies & Contraindications
Sunday, 2 July | 08:45 - 11:00
Sponsored by: GOED OMEGA-3

Welcome
Ellen Schutt, Managing Director
Global Organization for EPA and DHA Omega-3s

Moderator
Richard Bazinet, PhD (University of Toronto)

Epidemiological Perspective and New Results Regarding Atrial Fibrillation and EPA-DHA Blood Levels
Bill Harris, PhD (Fatty Acid Research Institute)

EPA-DHA Intake and the Risk of Atrial Fibrillation: Emerging Evidence and Open Questions from Interventional Studies
Aldo Bernasconi, PhD (GOED)

Epidemiological Perspective on Bleeding and EPA-DHA Intake
Bill Harris, PhD (Fatty Acid Research Institute)

Systematic Review of Interventional Trials Across Specific Population Groups for Bleeding and EPA-DHA
Kaitlin Roke, PhD (GOED)

Evaluating the Effect of Placebos on Outcomes and Conclusions in EPA-DHA Interventional Trials
Harry Rice, PhD (GOED)

Closing Panel Discussion

SATellite 2

Challenges & Opportunities of Implementing ISSFAL’s Statement on Omega-3 Fatty Acids & Prematurity Prevention
Sponsored by:
Sunday, 2 July | 11:15 – 15:50

Taking a workshop format, this symposium, based on the recent ISSFAL Statement #7 relating to the role of Omega-3 in the prevention of prematurity, will present a summary of the evidence behind the statement and then with a panel of international researchers will explore the challenges and opportunities of implementing its recommendations. Themes to be discussed include its integration into pregnancy health care, how to identify and define low in omega-3 status, sources of Omega-3 to maintain/correct low status and priorities for future research.

Chair wrap-up

SATellite 3

Long Term Effects On Child Neurocognition Of Balanced Long Chain PUFA Nutrition
Sunday, 2 July | 14:50 – 17:00
Sponsored by:

A wide ranging programme will present aspects of 1-cPUFA nutrition for the neonate and in early childhood. Presentations will include consideration of topics such as nutrient deficiency and Omega-3 DRIs, the effects of Omega-3 on neurocognition in children with malnutrition and neonatal DHA and cognition.

14:50
Opening / Welcome
Chairs: Prof Tom Brenna and Prof Isabelle Marc

14:55
Beyond Nutrient Deficiency/omega-3 DRIs
Prof Michael McBurney (University of Guelph)

15:15
Effects of omega-3 fats on long term neurocognition in children with severe acute malnutrition
Prof Tom Brenna (University of Texas at Austin)

15:55
Coffee Break (15 min) - Courtesy of ISSFAL

15:50
Setting up the newborn for great start: The dose response study
Dr Jacqueline Gould (SAHMRI)

16:10
Neonatal DHA in Preterm Infants and Intelligence at 5 Years
Prof Maria Makrides (SAHMRI)

16:40
Omega-3 fats in prenatal nutrition
Dr Sissel J Moltu (Oslo University)

17:00
Closing
