HRE Wheels Carbon Fiber Line

Any well versed car buff is certainly familiar with HRE Wheels, California based leader in high quality forged wheels since 1979. Traditionally constructed of aerospace grade forged aluminum, their wheels combine timeless style with race inspired specifications to create an all-encompassing piece of automotive jewelry. Suitable for supercars, sports GTs, and performance sedans, innovation never stops at HRE as they now offer even lighter CF201 carbon fiber series wheels.

By utilizing a 1-piece full carbon fiber barrel, the CF201 wheel reduces weight by a whopping 25% compared to other lightweight 3 piece designs. The center is constructed from 6061-T6 forged aluminum and mated to the barrel using American-made titanium assembly bolts. Needless to say, these wheels are the ultimate in performance and exclusivity, as each set includes a serial numbered carbon fiber-aluminum card supplied by Camisasca Automotive.

In addition, to compliment this line of carbon fiber wheels, HRE is now offering a line of beautiful HRE branded carbon fiber accessories supplied by industry partner Camisasca Automotive Manufacturing.

Among these accessories is our very own first full carbon fiber license plate frame. Manufactured completely from composite, we coupled our lightweight pre-impregnated carbon fiber frame with a custom carbon fiber nameplate featuring screen printed HRE relief. The final product represents our lightest and most advanced license plate frame to date.

In addition to supplying the carbon fiber HRE frame, we've also custom manufactured a beautiful carbon fiber Sport Tag key chains featuring HRE graphics, HRE carbon fiber wheel centers, and HRE carbon fiber valve stem caps for a complete accessory set.

Please visit www.HREwheels.com for more information on their line of exquisite wheels and accessories.

Monterey 2013

Pebble Beach has exploded into an industry affair which descends upon the Monterey Peninsula once a year in a flurry of octane and inspired design.

Much has been said about this year's events in the form of articles and broadcasting, which never cease to amaze and impress. However, a few here at CAM Inc. had the unique privilege of enjoying it as a family affair, family dachshund included!

Beginning with Tuesday's Carmel Concourse on the Avenue, our car pooch was hoisted along to begin the festivities. A unique event as its open to the public, the 60 years of Porsche were especially highlighted as 911s from all era's and all pages of automotive literature were present. Our particular favorites being a 1968 Sebring Porsche 911S, 1967 Nurburgring Porsche 911R, and hand painted 1969 Porsche 911S as a form of "effeminated masculinity".

Two days later, after a day of hiking, the Pebble Beach Tour thundered up and down US 1, before taking over Carmel's ocean avenue in a sea of onlookers. Entertained by some spectators' daring and not-so-daring outfits, the girls proved their smarts in identifying show cars between fashion observations. Again, particular highlights were certainly the 1965 Ferrari 250 LM and 1956 Aston Martin DB3S Coupe. However, Skippy, the dog, proved less discriminatory, preferring any car offering a hint of shade.

Moving into the weekend, our requirement for a hollow leg came into the lime light. Beginning with Bonham's morning brunch and auction preview, a certain 1965 Lotus Cortina barn-find caught our fancy, whilst we enjoyed old stories of fabled Phil Hill with friends. After a short tram up the road, we visited the Quail Motorsports Gathering. Once inside senses battled as intrigue led us to cars and stomachs to the various buffets. Aston Martin was of particular importance here, as the 100th anniversary celebration continued. We also personally enjoyed seeing the Norman Dewis

Speed Record Jaguar 120, while some seemed to find Skippy of more entertainment.

Saturday was spent at the track as we joined the BMW CCA corral beside turn 5, just as the Can Am cars were finishing their warm ups. Venturing into the pits, nearly any derivation of vintage motorsport could be had, from 1930s Grand Prix cars to 1980s IMSA. Admiring various classes and marks, the girls unanimously decided the *Alfa Romeo GTAs* and *1965 Alfa Romeo TZ1* were their favorites. Corvette was the real star however, as early Sebring cars, original Stingray prototype, and a potpourri of new C7's greeted us from the *Rolex Moments in Time* tent.

Taking Sunday off to relax while Pebble Beach raged on without us, we were able to reflect upon the cars, people, and events we were fortunate enough to enjoy. Humbled by the brevity of it all, we discussed our favorite moments, and all decided we were happy and honored to have just been able to observe a privilege of the industry we enjoy.

A very big thank you to all the OEM and personal participants in this year's Festorics. Your dedication and generosity brought smiles to our faces and fond memories for years to come. Thank you.

Restore A Tag

Classic car restorations are big business, and many passionate owners go to great lengths to bring a car back to showroom fresh condition. No detail can be overlooked and a restored period-correct license plate is just part of the total package.

RestoreATag is the premier license plate restoration company having developed a unique and highly effective museum quality restoration process to bring back old, rusty plates to beautiful works of art. Their 11 step process uses only the finest materials and expert craftsmanship for a plate that looks as good as new, or in many cases, even better!

Naturally, such valuable license plates require theft protection that is intelligent, effective, and completely inconspicuous. With these requirements in mind, we're very happy RestoreATag has chosen to use our Security Caps to protect their client's investments, and additionally, offer the caps as a standalone product for customers in need of plate protection. Whether you own a rare vintage plate, one with sentimental value, or want to protect yourself from automotive identity theft, security caps are the best way to secure your plates from tampering.

For more information on RestoreATag, please visit www.RestoreATag.com to review their restoration services and plate accessories.

Back To School

All of us here at Camisasca Automotive Mfg., would like to wish you and yours an enjoyable and prosperous new School Year. And don't forget, it's okay to show a little pride!

Happily we have just completed a special custom order for our local St Anne's School here in Laguna Niguel, California. Finished in Brushed Stainless Steel with correct CI laser etched graphics, these frames are sure to last, showing off school spirit from Preschool up to Middle. Go Knights!

For more information on our line of quality made automotive accessories and parts, please feel free to contact us at sales@camincusa.com or (800)452-1735
