

Josh Spoon, an artist and producer from Los Angeles, CA combines his early roots in hip hop and elements of electronic music to move the crowd. Spoon's live sets are a journey of beat and rhythm that get's people dance and head bobbing.

Josh has created music that has been featured on Barry Rothbart's "*Streets of Fire*" and Transworld Snowboarding "The Nation" both releases contained high energy songs that stem from two different musical worlds. His influences come from a broad range range of music and artist. Josh likes to mix his influences in his music to make hard beats with soulful groove and melodies.

The dynamics is what makes Josh Spoon stand out out among other electronic artist. A audience member once said, "It's like Dr. Dre meets The Flaming Lips".
