in partnership with the Flint River Soil and Water Conservation District and Seminole County Young Farmers/FFA

RENT BY THE ACRE

$15 per acre

For more information, contact info@flintriverswcd.org
Let's drill into the benefits!

A NO-TILL DRILL IS A PLANTER THAT ALLOWS FOR PLACEMENT OF SEEDS WITHOUT DRASTICALLY DISTURBING THE TOPSOIL

No-till drill planting is a great way to establish forage or cover crop while increasing profit and efficiency by reducing labor, machinery, and fuel cost. With added environmental benefits

• Improves soil structure
• Reduces compaction
• Reduces soil erosion
• Increases organic matter

Improve efficiency, advance profitability, and expand environmental stewardship by reserving today!

For more details about the No-Till Drill, visit our website at www.flintriverswcd.com or contact us at info@flintriverswcd.org
