INNOVATION – The spirit that drives SELEE® to continuously think of NEXT.

PRIMARY COPPER FILTERS

REDUCED BREAK FREQUENCY: Reduces wire and rod breakage up to 35%.

REDUCED SCRAP DUE TO FURNACE CHANGEOVERS: Increases casting speed and fewer furnace changeovers due to scrap and slag carryovers.

REDUCTION OF SCRAP RELATED TO SLAG TREATMENT: Significantly reduces scrap and increases casting yield.

REDUCED INCIDENCE OF NOZZLE BLOCKAGE: Removes inclusion material, dramatically reduces nozzle blockage and increases production run.
