CONSULTING

LET US HELP YOU BRING A ONE DAY HACKATHON TO YOUR SCHOOL DISTRICT

A WINDOW INTO BUILDINGSTEAM

Laurie Carey Consulting would like to come in for a free informational session on “**How to bring a One Day Hackathon to your school district**”. In this information session our team will share with you how to deliver this immersive program and how your school can be a leader in inspiring computer science in your district.

This informational workshop will immerse your school district leaders, school administration, and your educators into understanding how this program meets the needs of introducing students to computer science in a fun and engaging way. This fun hands on activity brings **critical thinking, synthesizing information,** and real world **problem solving** to life.

The program “**BuildingSTEAM**” is an introduction to the world of website development. Designed to support student’s in grades 5th-8th the discovery of career opportunities and experience an immersive entrepreneurial project based learning program.

We have developed a number of programs that will bring your district into the leader role for STEAM education. Visit our website **Laurie Carey Consulting**, to learn more and take advantage of our **free consulting workshop** to help you plan your 2017-2018 year.

To find out more about this program or our other STEAM in the classroom programs call us at **631-468-7477** or email our team at **Training@lauriecarey.com**.
