## CONSULTING

## LET US HELP YOU INTEGRATE SCRATCH CODING INTO YOUR CLASSROOM A WINDOW INTO LEARNING TO CODE WITH SCRATCH

[Laurie Carey Consulting](#) would like to come in and deliver a **SCRATCH HOUR OF CODING** a one hour workshop for your students to introduce them to drag and drop block coding.

This workshop will immerse your students into the world of problem solving and an introduction into block coding. Using coding to provide students foundational skills that develop **critical thinking**, **synthesizing information**, and real world **problem solving** to life.

The “**SCRATCH HOUR OF CODING**” workshop was designed as a subset of our “**SCRATCH In The Classroom**” curriculum, which is one of our 20 hour STEAM programs. This program is designed to support lower level grades **3-5** with a discovery into learning to code, creating an interest in learning more through fun engaging problem solving.

We have developed a number of programs that will bring your district into the leader role for STEAM education. Visit our website [Laurie Carey Consulting](#), to learn more and take advantage of our **free consulting workshop** to help you plan your 2017-2018 year.

To find out more about this program or our other STEAM in the classroom programs call us at **631-468-7477** or email our team at [training@lauriecarey.com](mailto:training@lauriecarey.com).
