SAAS: TECHNOLOGY & EXPERIENCE

We’re a tech cooperative that helps organizations navigate complex software.

Software as a Service (SaaS) solutions—including Salesforce, ServiceNow, Workday and more—can offer incredible technological advantages, but you need skill and experience to make the right choices.

POWERFUL TECHNOLOGY

We can help you take full advantage of all the cloud has to offer:

- CRM strategy and implementation services.
- Migration from legacy systems without loss of productivity.
- Integration with other ERP systems.
- Sales and marketing optimization, including custom app development.
- Revitalization of existing implementations, including streamlined processes and improved analytics.

EXPERIENCED IMPLEMENTATION

Making the most of SaaS technology depends on proper implementation. Our consultants have the experience, honed through many projects, that will make all the difference:

- Work with certified, cloud specialists who have worked in manufacturing, finance, government, health care, nonprofit and more.
- Get senior, local talent that’s on site a full five days a week.
- Decrease risk with consultants who have worked on dozens of SaaS projects.
- Get access to experienced administrators, developers, architects, BAs, BSAs and PMs.

OUR SUCCESS SAYS IT ALL:

- Staff around 100 consultants per year.
- Work with Fortune 500, higher education and state governments clients.
- Five straight years with revenue around $10 million.

“Iceberg’s consultants are innovative and client-focused. They think of the client’s needs first. I really appreciated their honesty—good news or bad news—and their ability to deal with any problem that came their way.”
