

Be a BSI Scholar

Description

The BSI Scholars program is a unique program that combines tuition assistance, academic counseling, and career mentoring for African American students wishing to pursue a degree in either civil or architectural engineering. Tuition assistance applies to any Missouri based university or college offering accredited coursework leading to a civil or architectural engineering degree.

Central Library, St. Louis Public Library

Citygarden

Eligibility

Eligible students will have demonstrated, through their high school academic record and ACT scores, the aptitude and work ethic necessary to withstand the rigors of a university engineering curriculum. Typically, they should have achieved a class rank in the upper quartile of their high school class and an ACT of at least 24 on both the Composite and the Math section. Class rank requirements may be adjusted for selective high schools.

Benefits

- Annual tuition reimbursement up to the published tuition at the University of Missouri-Columbia (currently \$10,500)
- Academic and career counseling provided by BSI professionals
- Assistance with securing engineering and/or construction related summer internships

Washington University athletic center in progress.

Renewability

Program participation is renewable for up to three additional years, provided the student maintains an acceptable level of achievement.

Sponsor

BSI Constructors, founded in 1972, is a leading St. Louis general contractor and construction manager. BSI is committed to equal opportunity for all individuals wishing to pursue a career in the construction industry. More information is available at www.bsistl.com.
