

Gain Insight Into Your Students

Open a window into your student population to better match your educational efforts with their needs as well as the opportunities in post-secondary institutions & industry.

STEM Premier® allows secondary schools & districts to see their student population and determine which efforts are working, identify areas for improvement and introduce their students to the opportunities in colleges, technical schools & industry.

Benefits To Schools

The Virtual Portfolio

Students build digital profiles showcasing everything about themselves: test scores, experience, videos, certifications and more.

Meaningful Insight

We provide insights on your student population to evaluate if your curriculum is meeting their needs and career interests

Early Access

STEM Premier allows colleges and industry to reach out to your students earlier and recruit them into their school or company.

Student Privacy

STEM Premier is committed to protecting students' privacy, and above all else strives to provide a safe and secure user experience.

Direct Connection

Schools can connect with their students directly, at any time through our internal messaging system.

Follow Your Students

Schools can target, track and follow their students' progress longitudinally from time at your school through their careers.
