LEVIATHAN SECURITY

LOTAN
Shine a light on all the silent failures in your network

69 DAYS
The average duration it takes to detect a data breach: With each passing day, your company is more susceptible to monetary and reputational damages. Lotan shrinks that time from months to hours, or even minutes, allowing executives to put risk management plans into action.

HOW IT WORKS
Until now, detection technologies have relied on what is known—a baseline of behaviors, a signature for an exploit, or knowledge of specific vulnerabilities. An approach that is complicated, antiquated, and falls in the face of novelty.

Lotan provides visibility and confidence to make decisions—reducing the noise to near zero and requiring no client software on the endpoint.

KEY BENEFITS

1. **IMPROVE RESPONSE TIME**
   - Lotan detailed insights from analyzed crash dumps to speed up response times

2. **REVEAL ZERO-DAY VULNERABILITIES**
   - Automatically detect exploitation of both known and unseen vulnerabilities

3. **NETWORK HEALTH INSIGHTS**
   - Increase insight into the health of your network and systems

4. **MINIMAL FALSE POSITIVES**
   - Automate event response with increased confidence & actionable data

ENHANCE YOUR SECURITY CAPABILITIES NOW WITH LOTAN

**CLOUD PLATFORM**
The cloud solution eliminates hardware overhead, deployment complexities, and gives you the freedom to scale as much as needed. Starting at a nickel a day per host.

**WHAT YOU GET:**
- Highly secure VPC deployment model
- 200 hour support contract
- Reduced (hardware footprint
- SEM integration consulting
- Starting at a nickel a day per host

**ON-PREMISE DEPLOYMENT**
Haven’t adopted the cloud yet? Lotan’s on-premise solution allows you to leverage existing (hardware within your infrastructure. Contact today to learn more about pricing.

**WHAT YOU GET:**
- Secure local environment
- 280 hour support contract
- Control over security, availability, and performance
- No hardware latency
- SEM integration consulting
