

MAGNETIC SKETCH WALL DESIGNER LAYOUT GUIDE

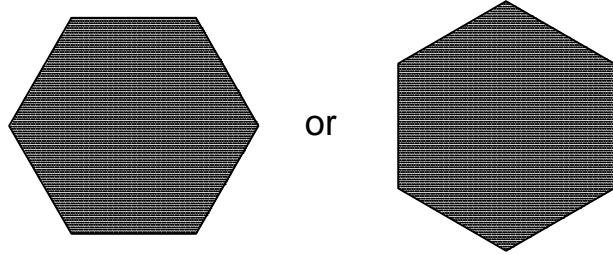

NAMING

All Hexagon Magnetic Sketch Wall Units are identified by the dimension between opposite flat sides. See the diagram below.

ORIENTATION

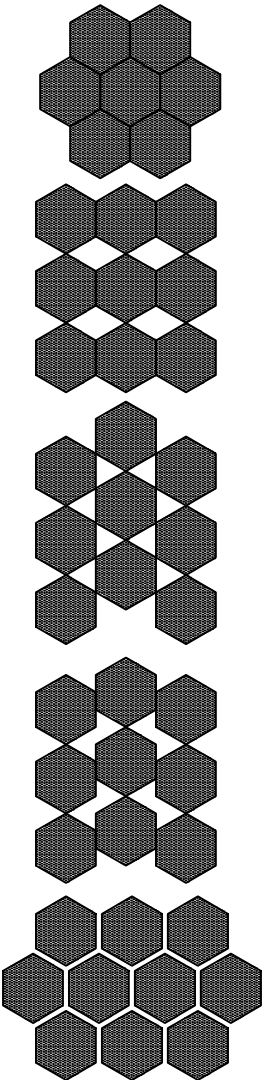

All Hexagon Magnetic Sketch Wall Units are shipped with a hanger and hardware that allow the unit to be hung with a flat side up or a point up. See the diagram below.

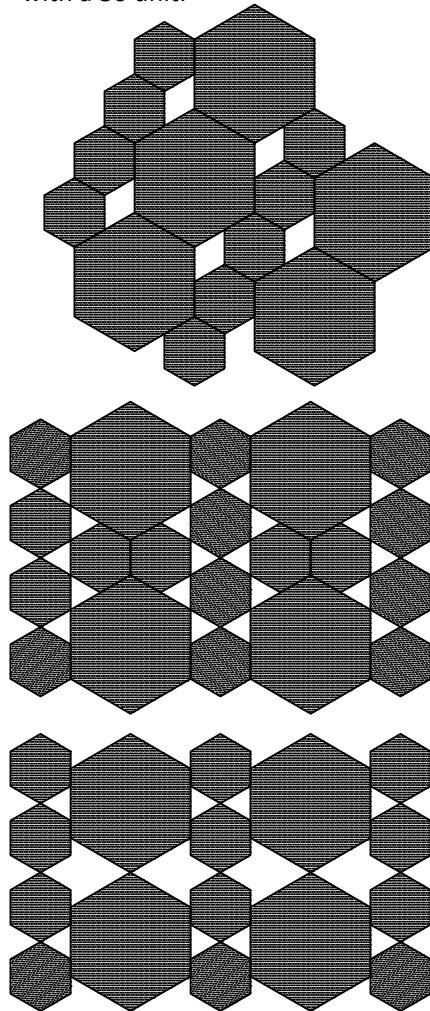

GROUPING

Hexagon Magnetic Sketch Wall Units can be grouped in many configurations. The groupings shown below can all be rotated by 90 degrees so that the flat side of the sketch wall is at the top.

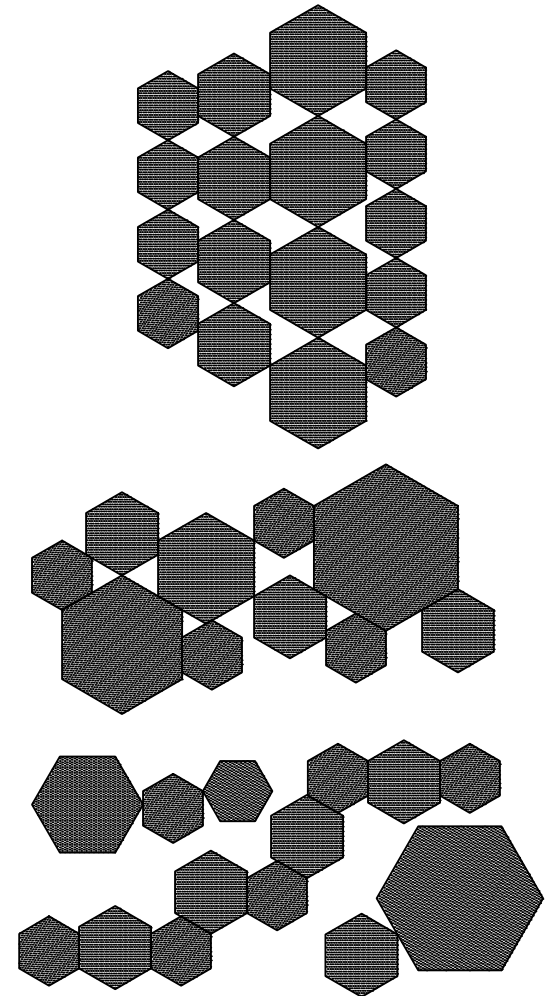

In these examples, all of the units are the same size.

In these examples of interlocking units, the large unit needs to be double the size of the small unit. A 15 unit would be paired with a 30 unit, and an 18 unit would be paired with a 36 unit.

In these examples a variety of different sized units were used in each grouping.

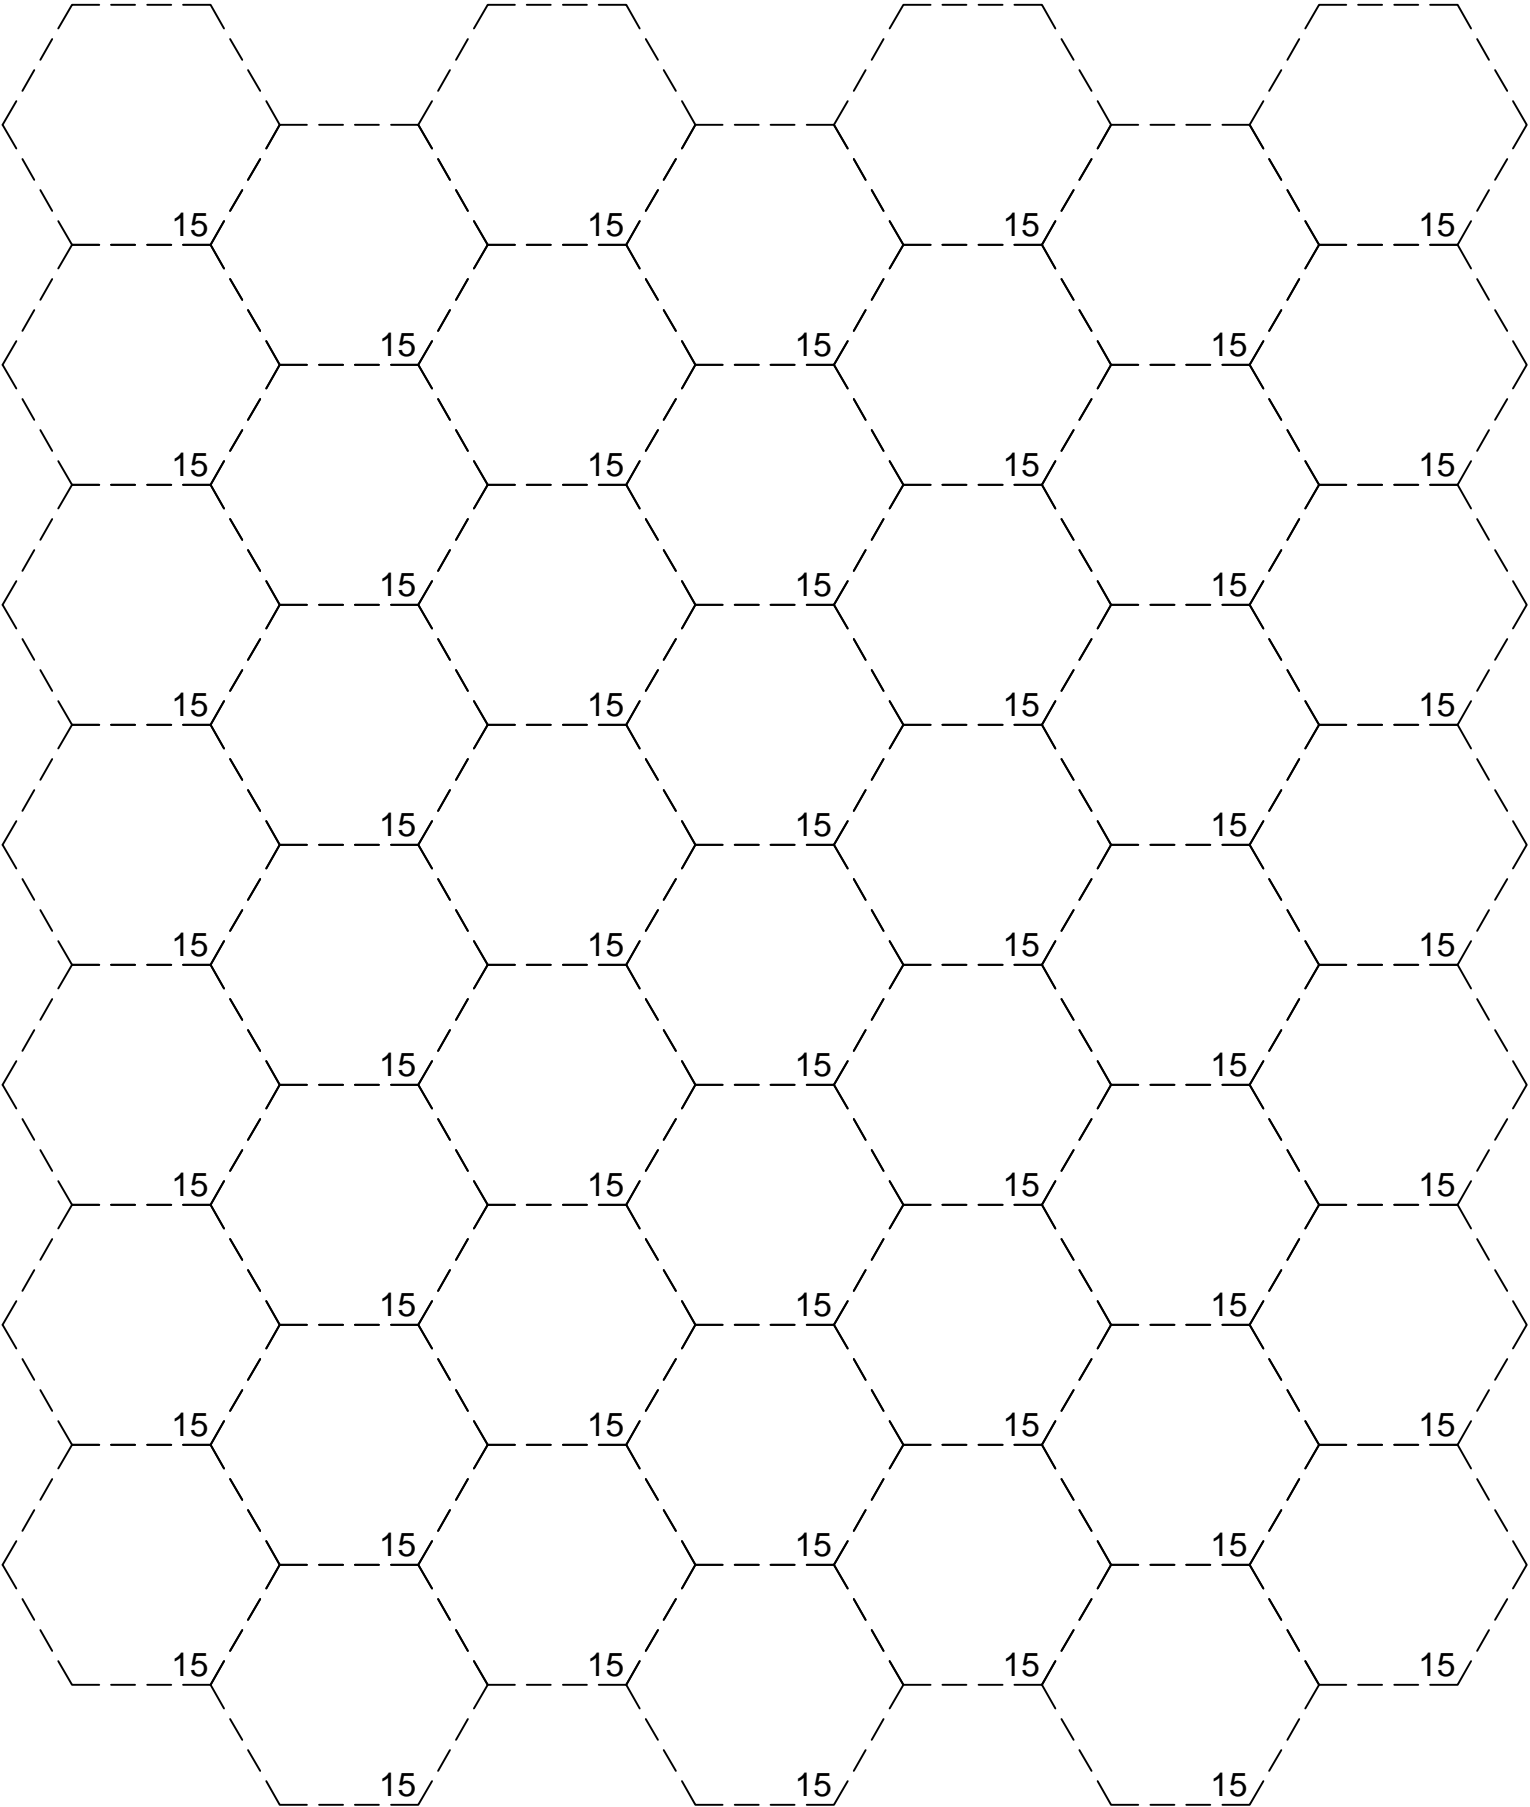

TEMPLATES

The following 5 pages contain templates for all of the sizes of hexagon Magnetic Sketch Wall. Each page has different size hexagons that are drawn to scale. When cut out, the designer can arrange them in endless variations and still be sure that the sizes are accurate. Additionally, they can be colored or printed on colored paper to further explore the possibilities.

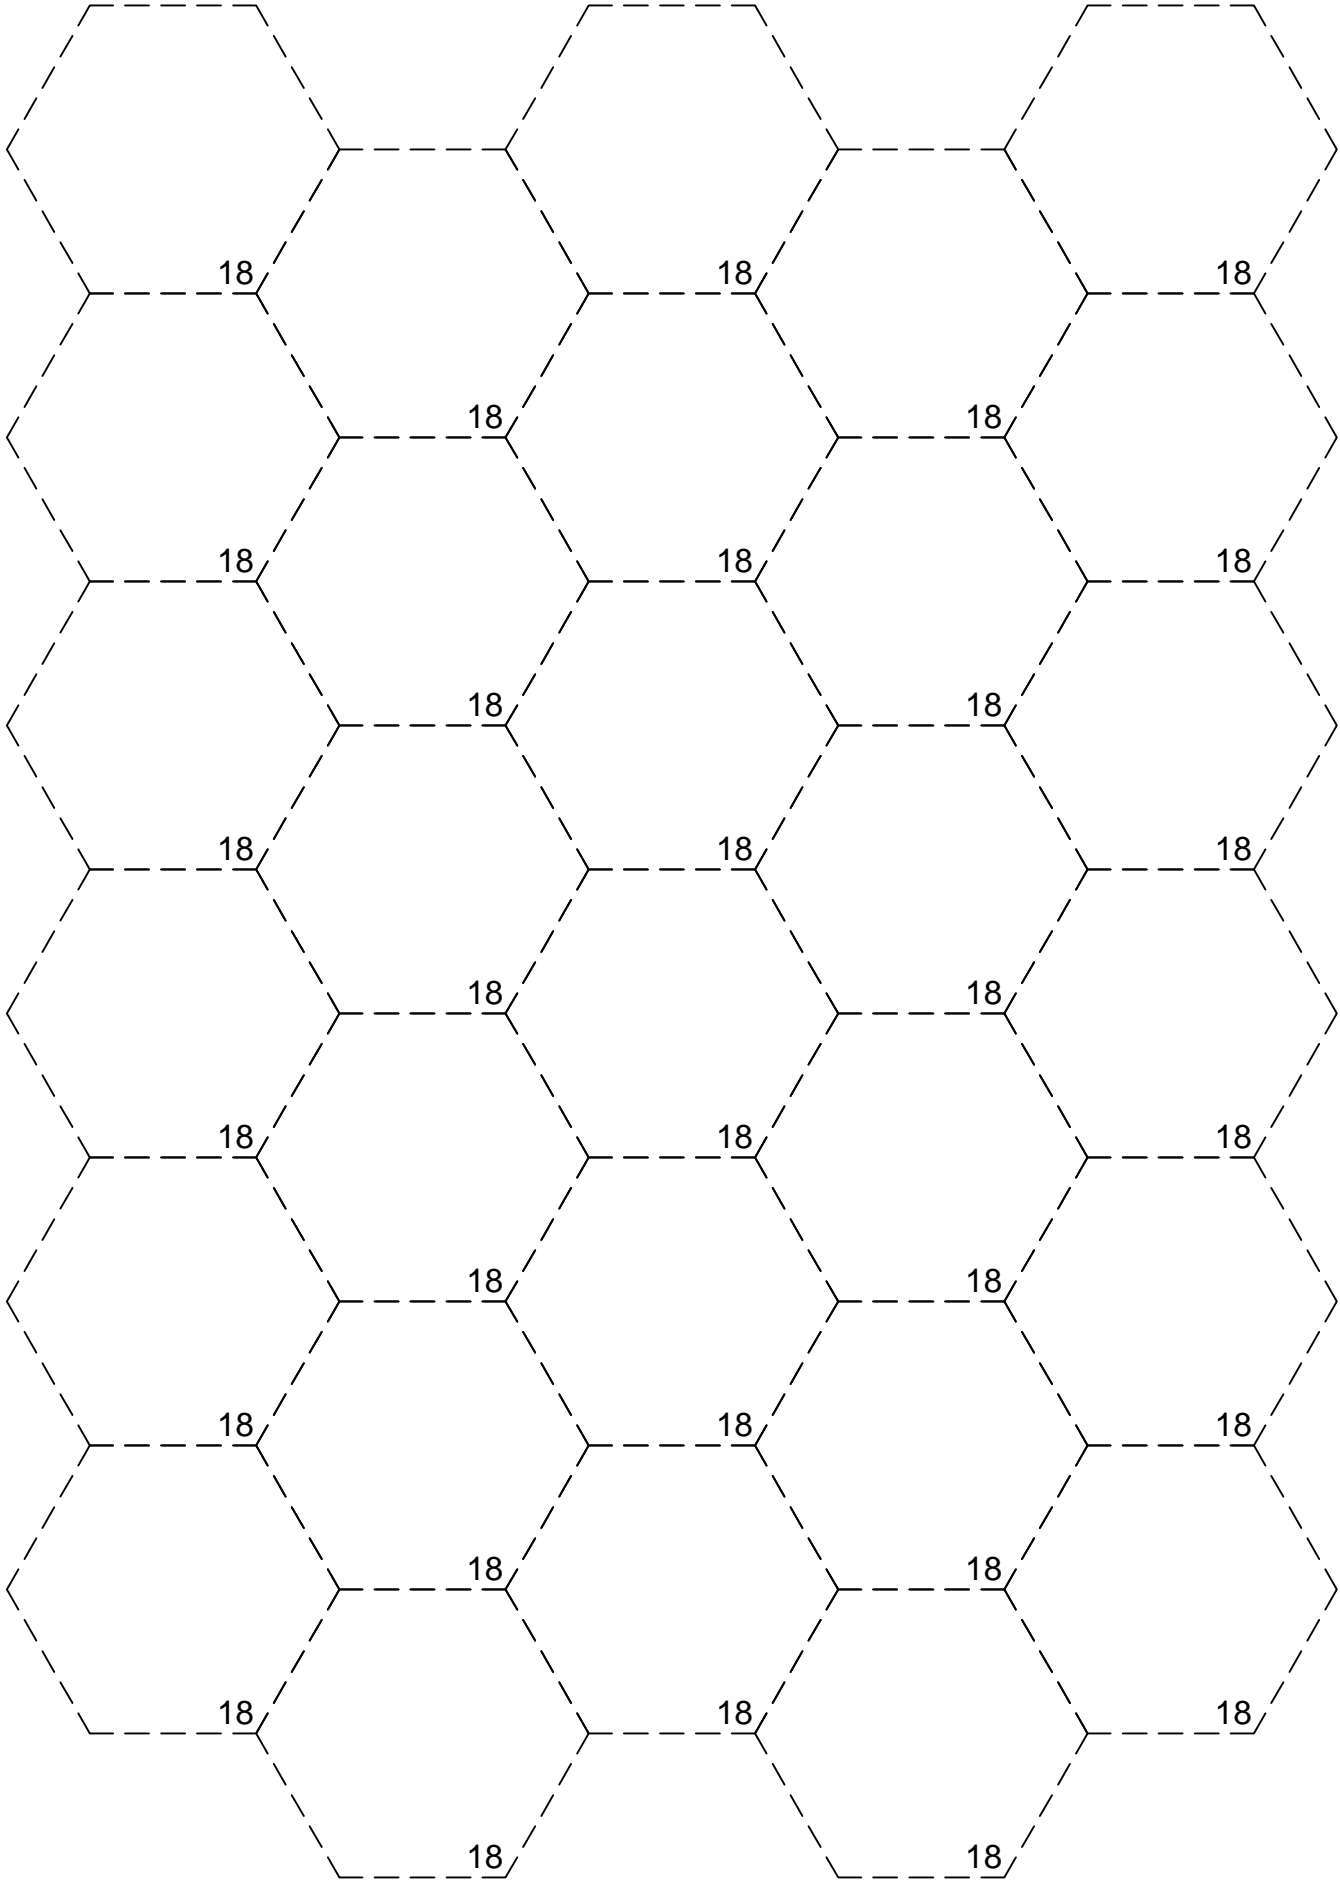

15" HEXAGON TEMPLATES: SW-HX-15-ST

SCALE: 1" = 1'-0"

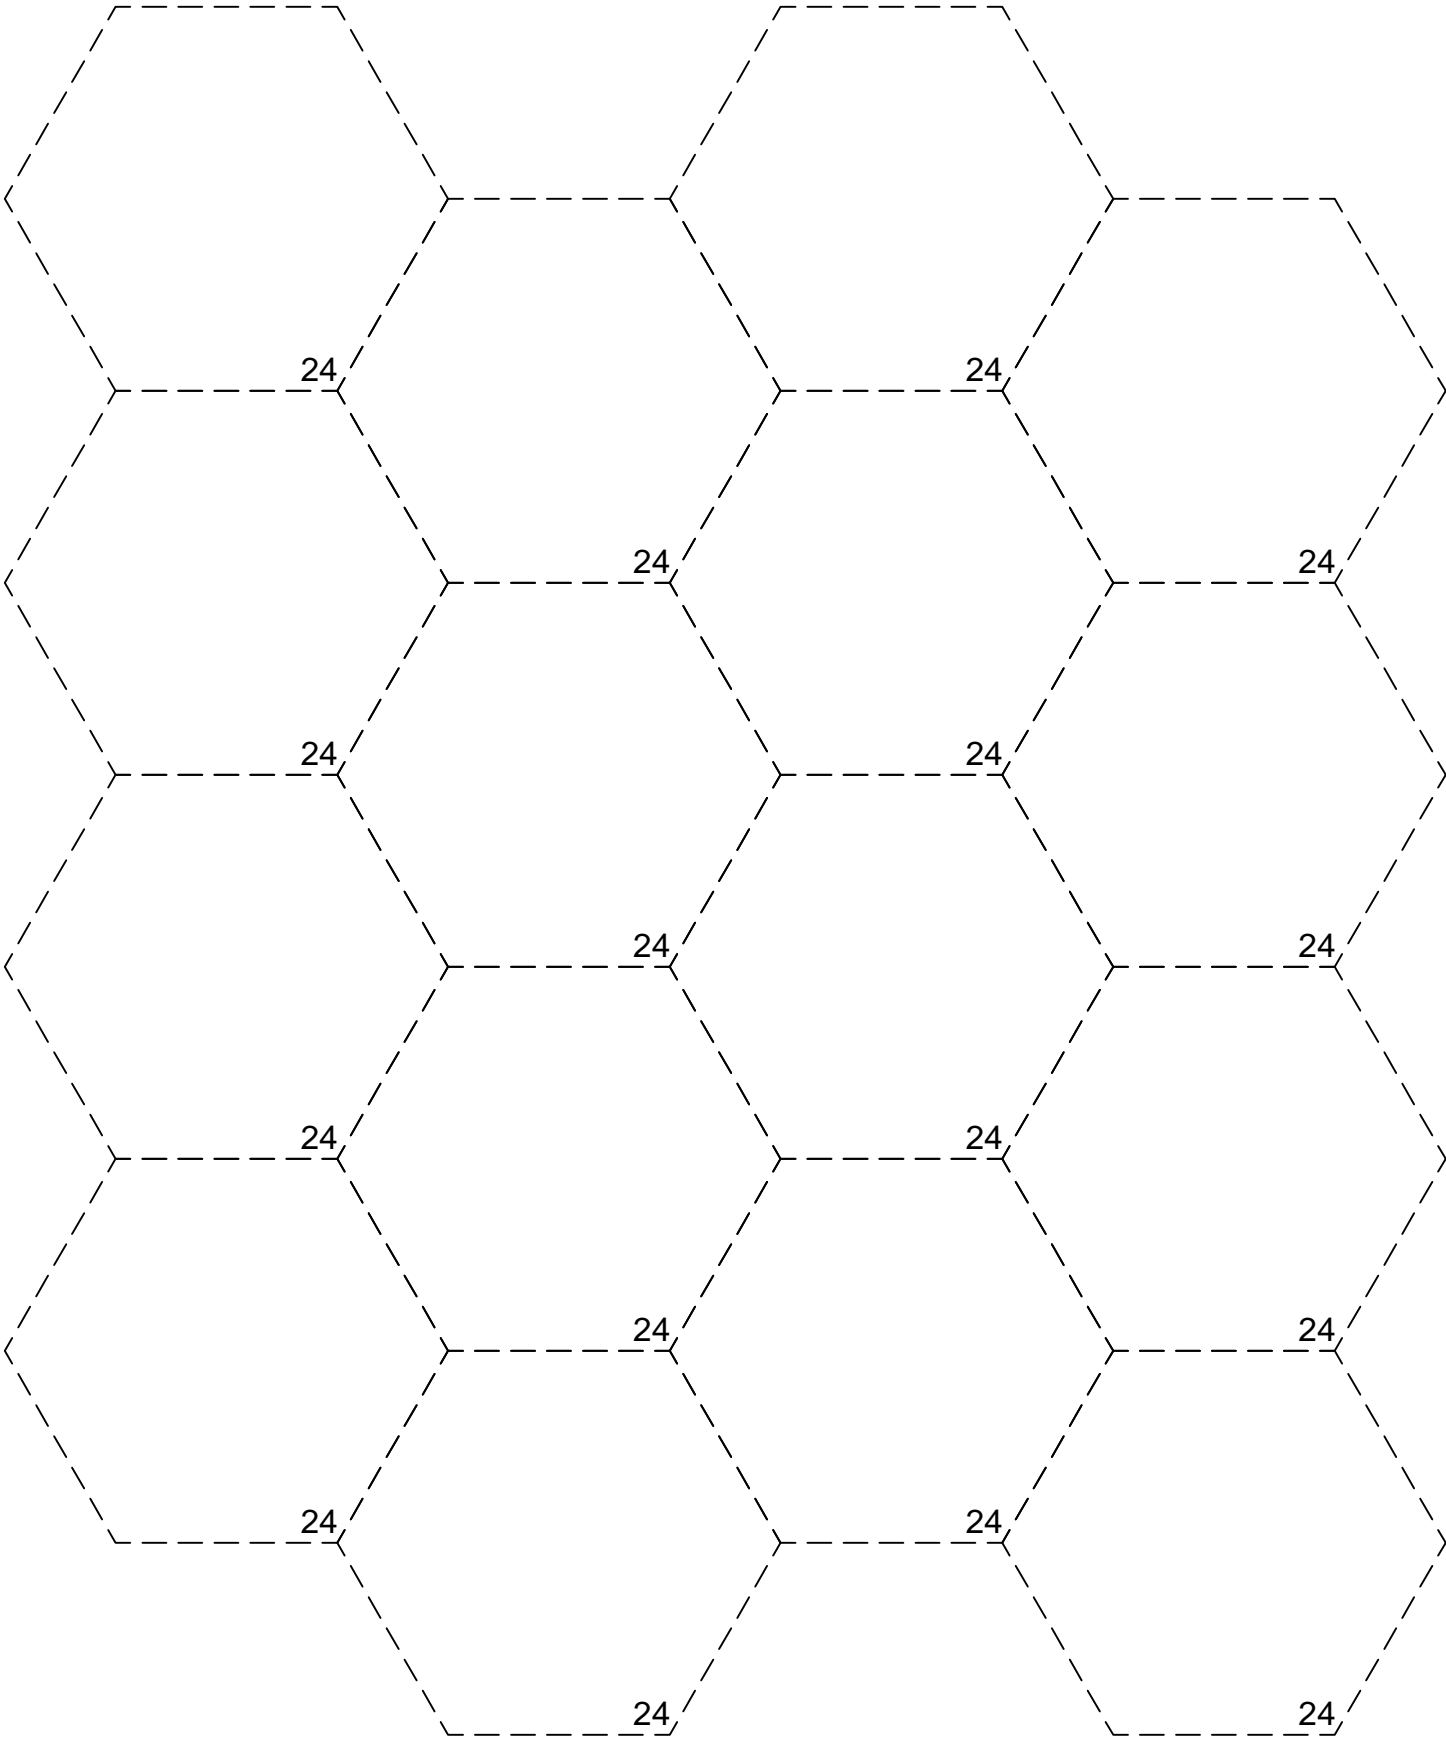

18" HEXAGON TEMPLATES: SW-HX-18-ST

SCALE: 1" = 1'-0"

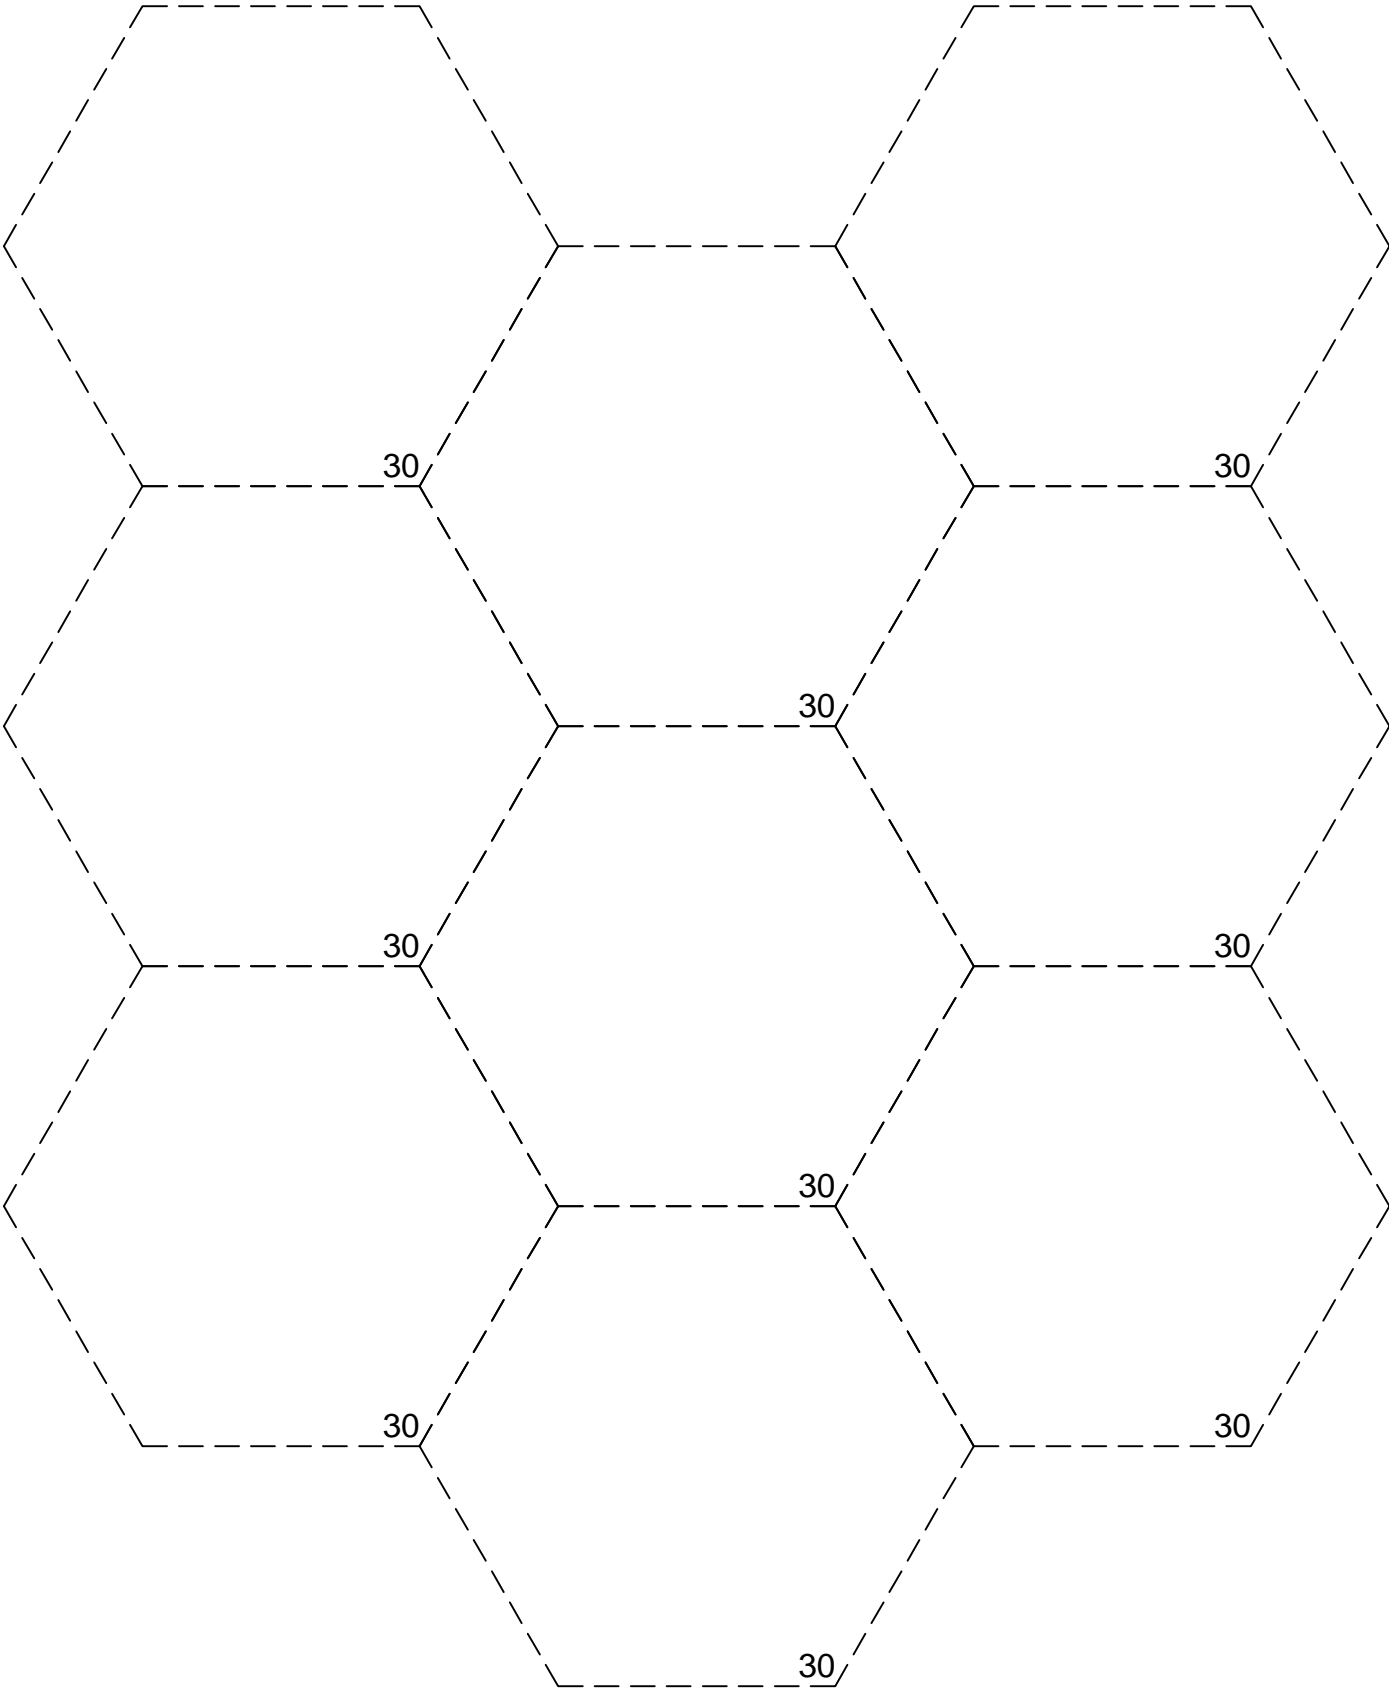

24" HEXAGON TEMPLATES: SW-HX-24-ST

SCALE: 1" = 1'-0"

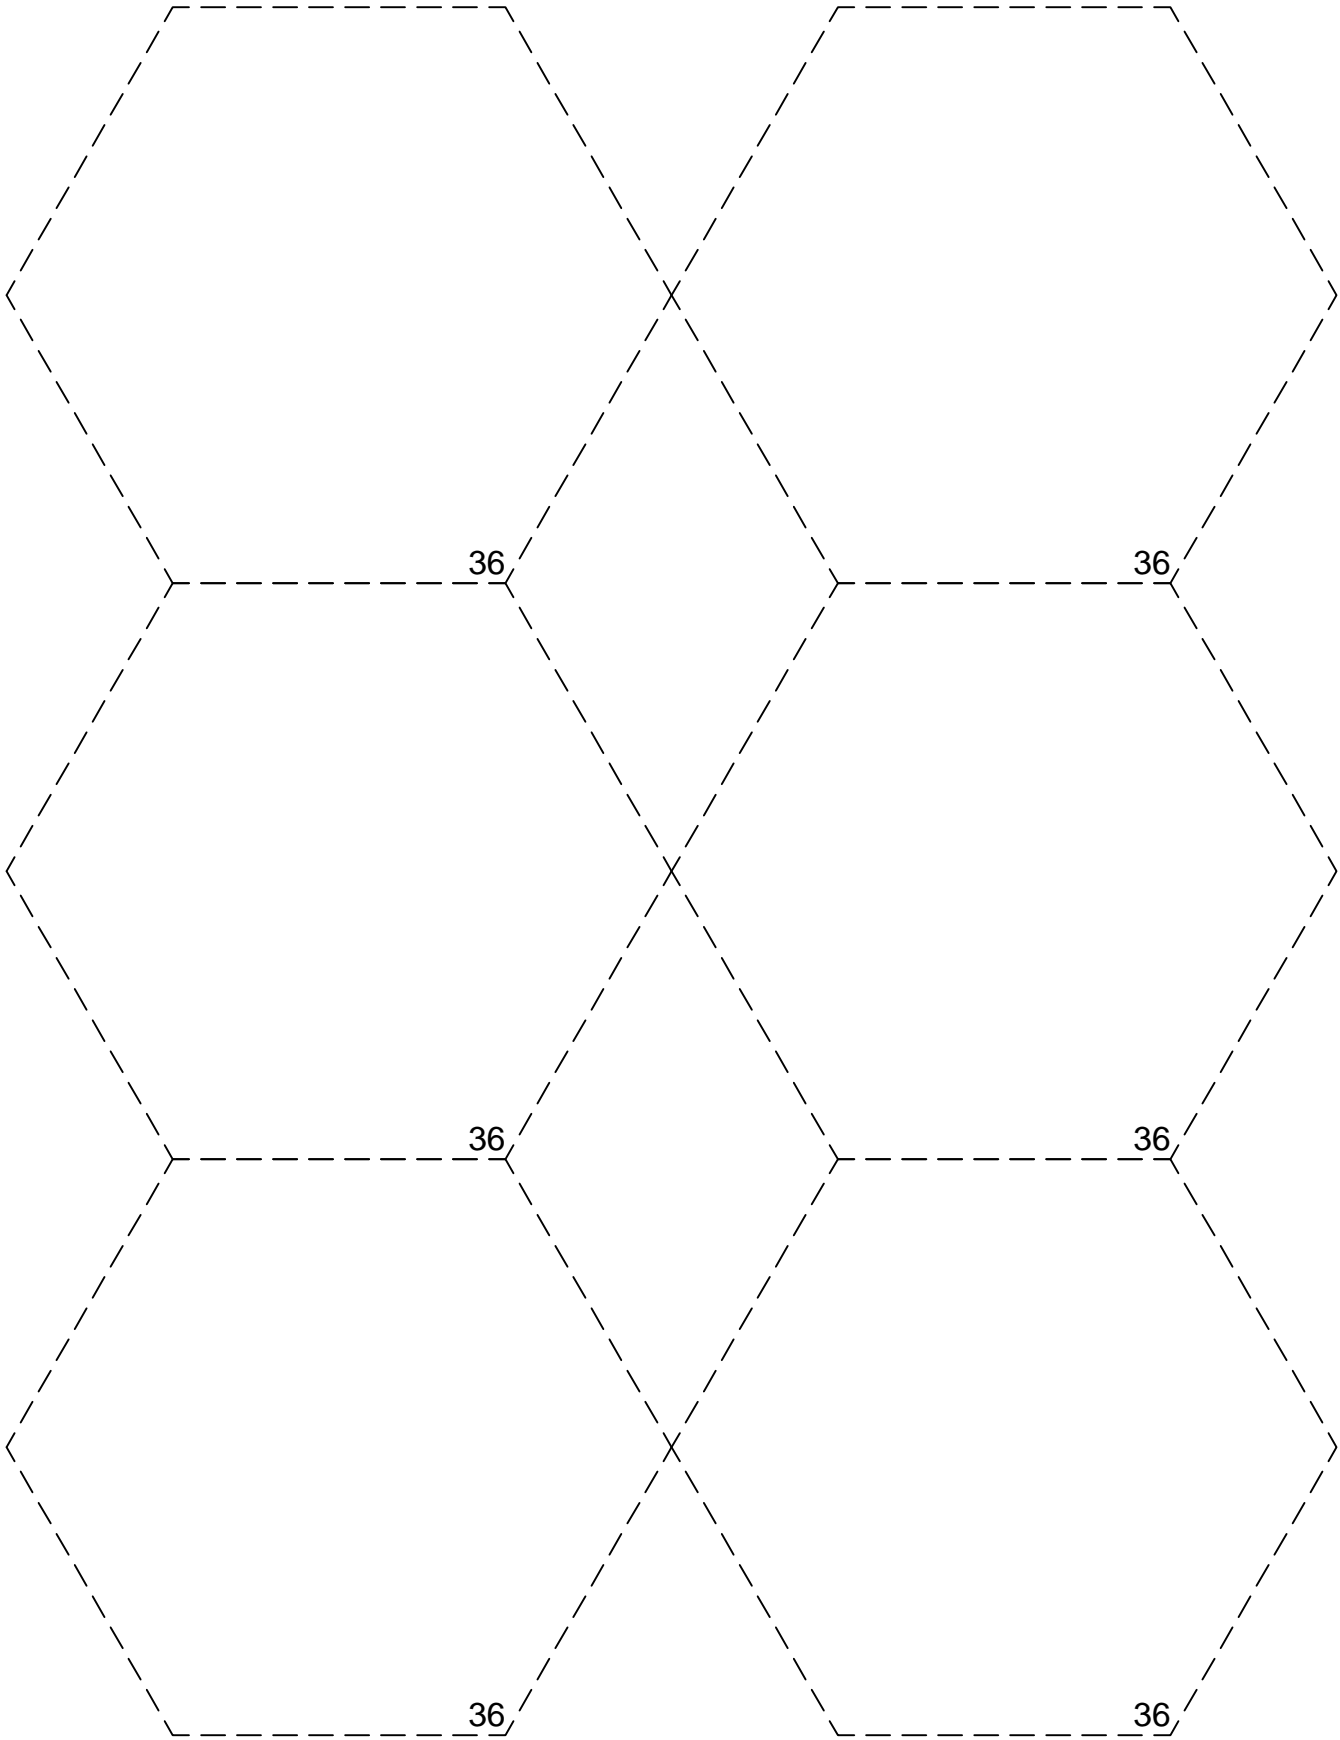

30" HEXAGON TEMPLATES: SW-HX-30-ST

SCALE: 1" = 1'-0"

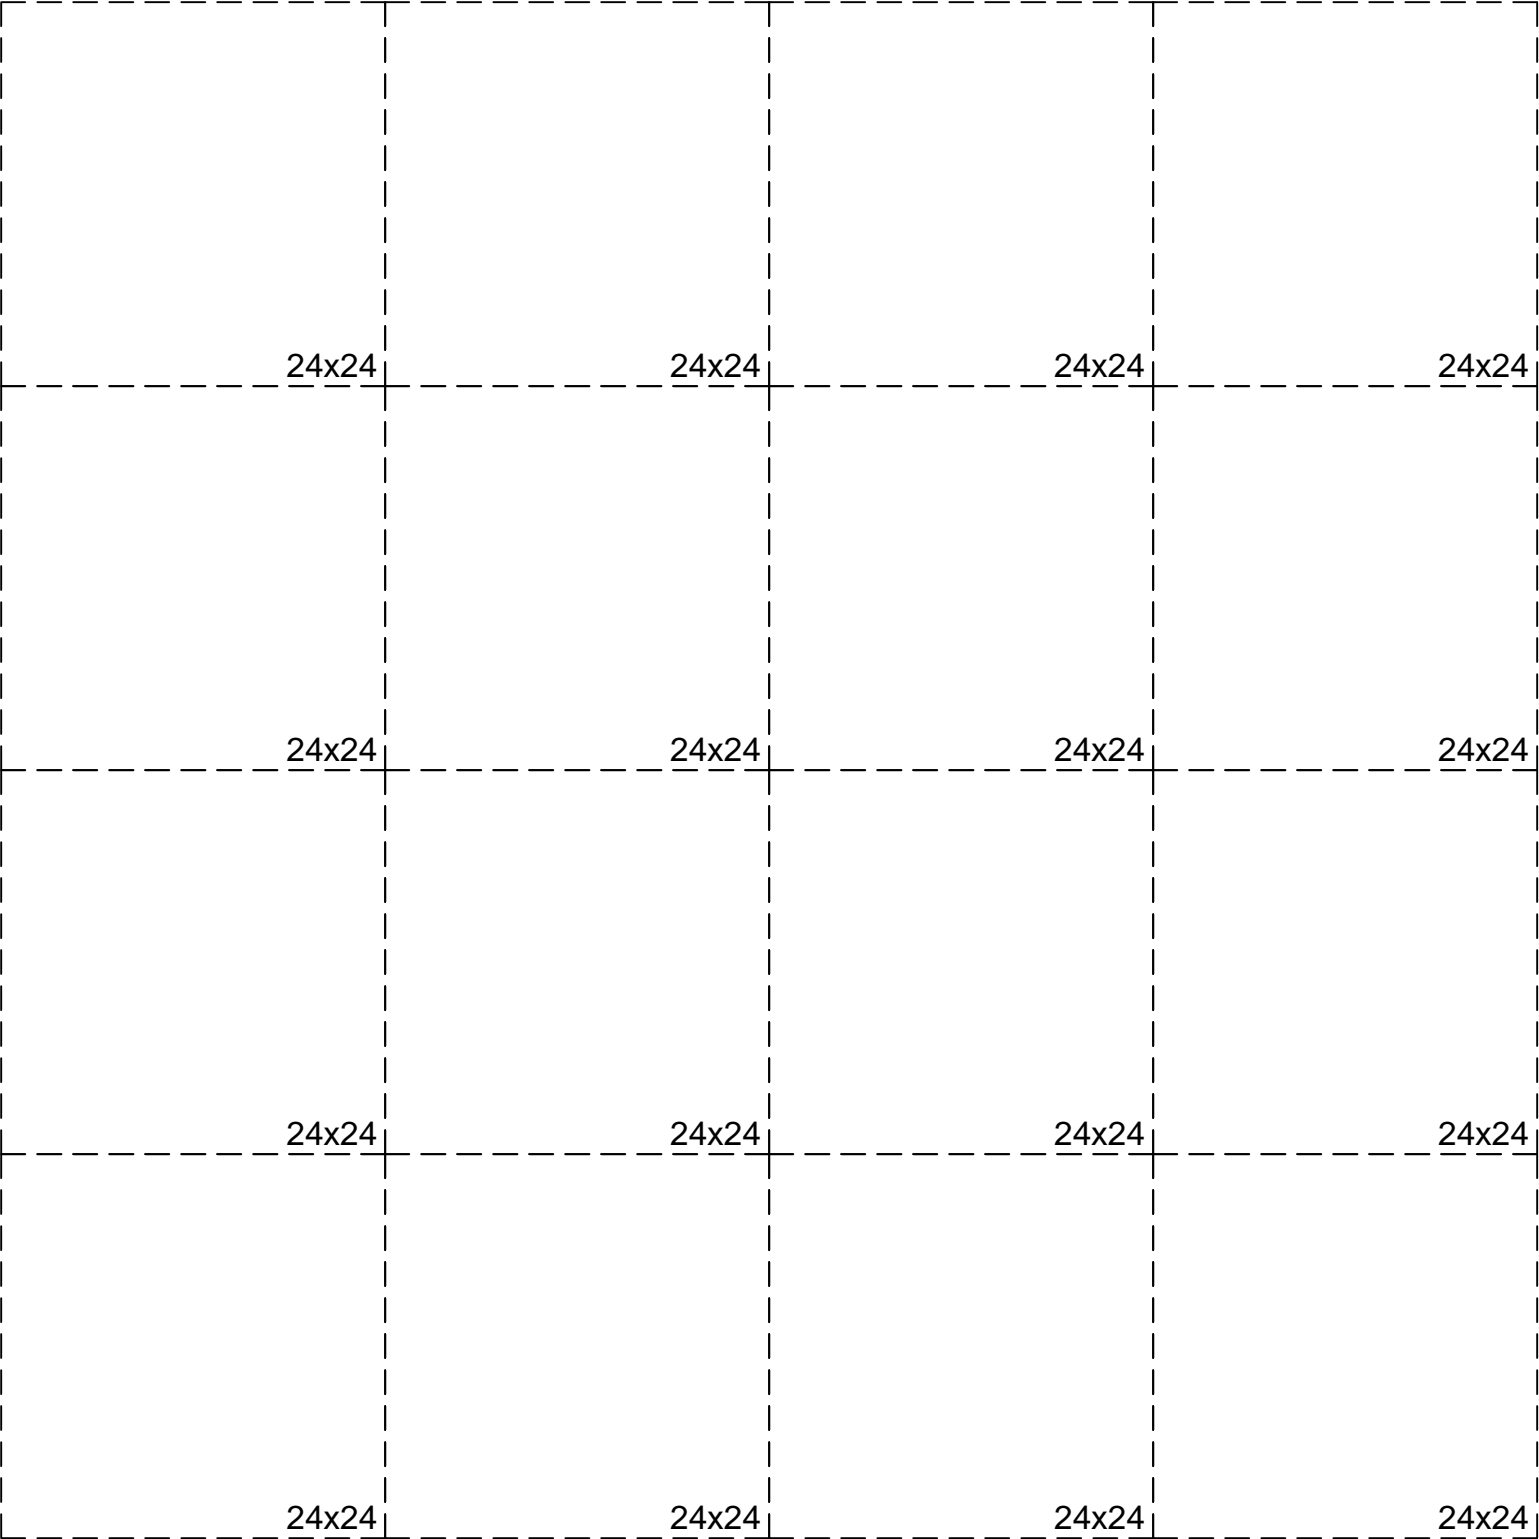

36" HEXAGON TEMPLATES: SW-HX-36-ST

SCALE: 1" = 1'-0"

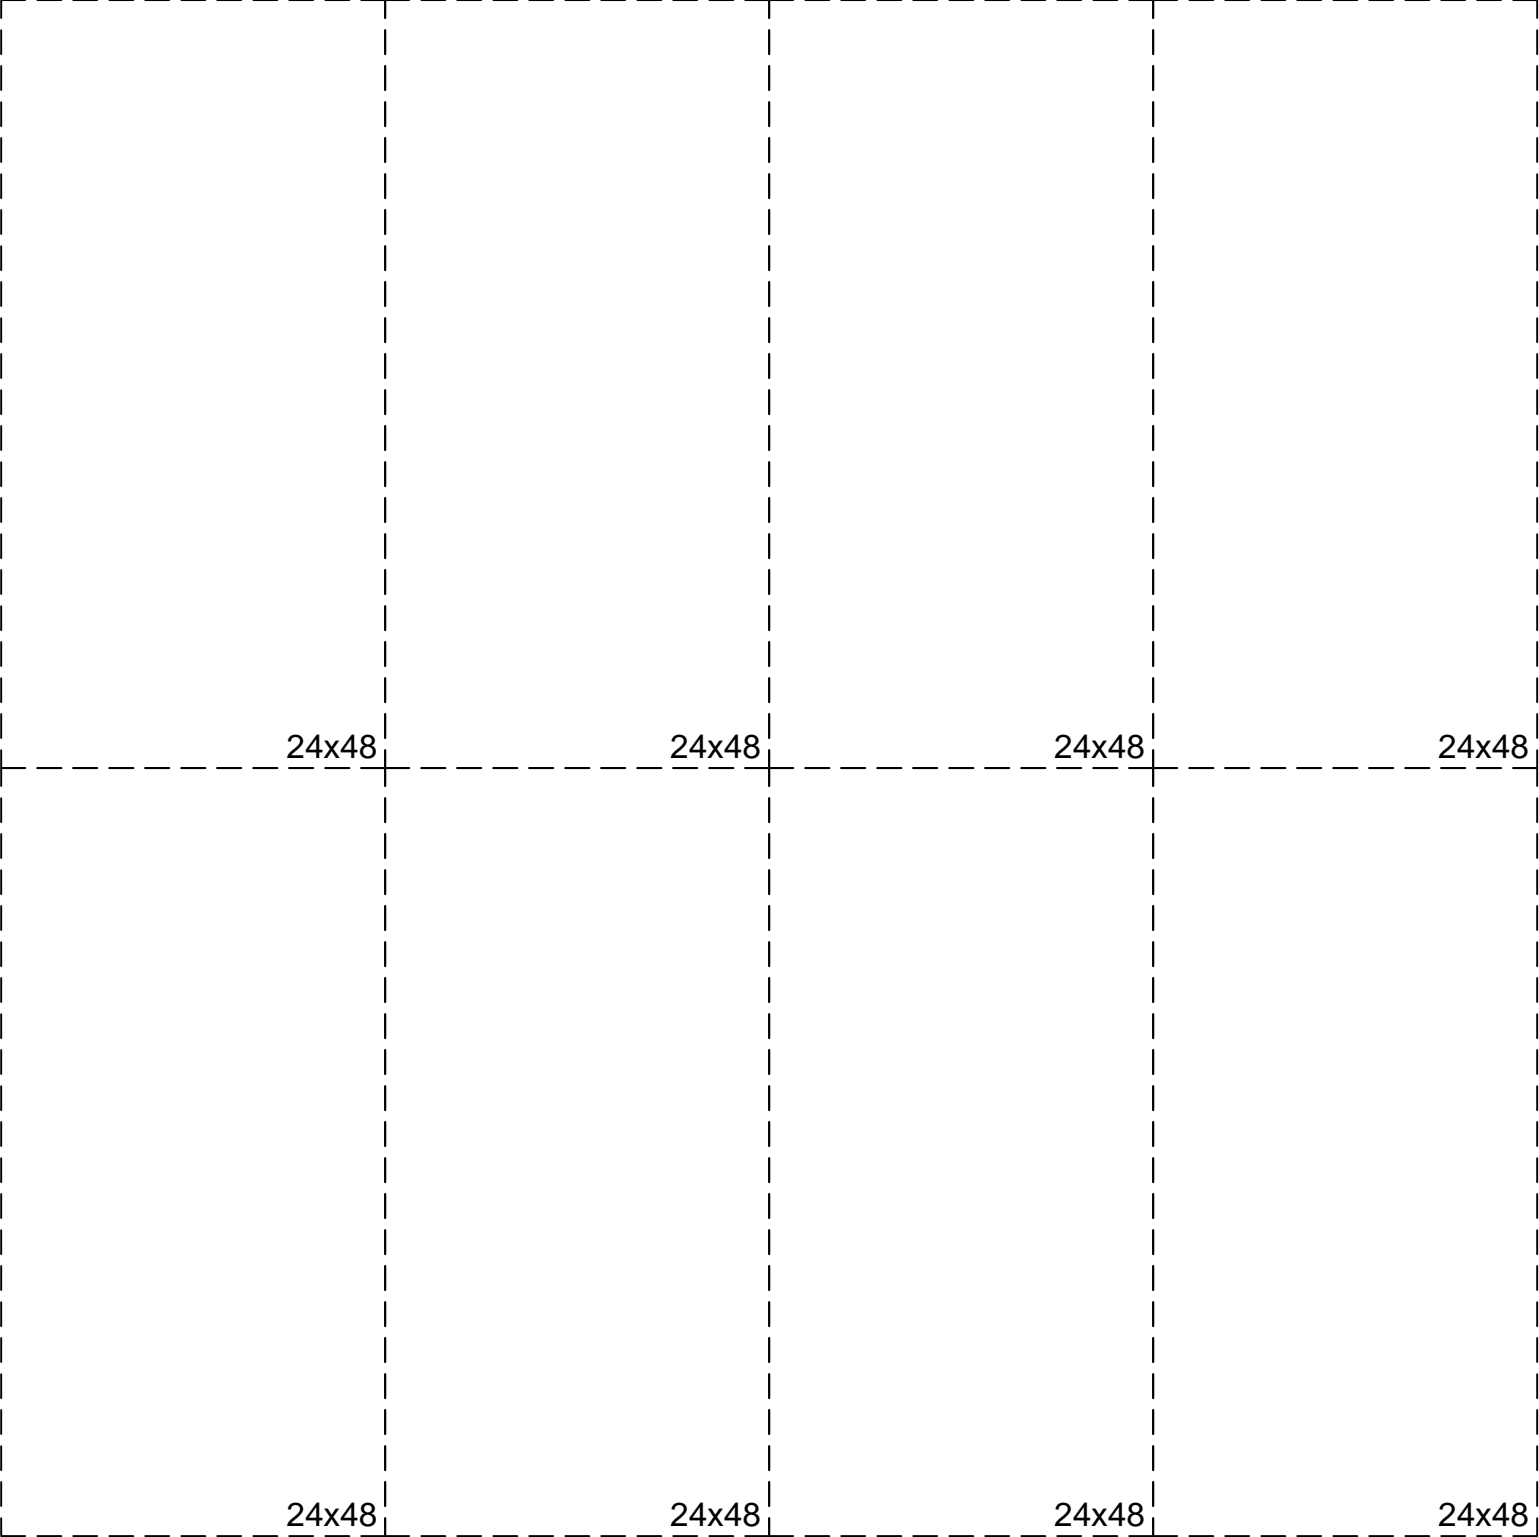

24" X 24" RECTANGLE TEMPLATES: SW-RC-2424-ST

SCALE: 1" = 1'-0"

24" X 48" RECTANGLE TEMPLATES: SW-RC-2448-ST

SCALE: 1" = 1'-0"

24" TRIANGLE TEMPLATES: SW-TR-24-ST

SCALE: 1" = 1'-0"
