The HB Modular Sign System is made from dovetailed aluminum extrusions, which slide together to form the completed sign. There is no back plate which in turn means that the sign may be single or double sided. Because it is frameless, there is no limit to the size of the sign. Therefore, the MSS can be extended or shortened by the addition or removal of profiles. At every stage the signs remain visually complete and securely fastened. Based upon a module pitch of 5mm (0.19 in) the HB Modular Sign System is comprised of profiles from 5mm to 150mm (0.19 to 5.91 in). Various profiles in the range can be added to allow the sign to become suspended, projecting and desk mounted.

The HB Modular Sign System is easy to assemble and dismantle – once you know how. A discreet locking strip is concealed within the 6mm thickness and there are no evident fastenings or fixings that could be undone with conventional tools. The concealed locking strip simply slides out by being pushed by a pin through a small hole located in the bottom profile.

The MSS is a simple assembly of strong, lightweight, extruded interchangeable aluminum profiles.

- The most flexible system on the market
- Ability to integrate with multiple Workshop2 Systems like the Chameleon.
- More profiles and fixing options than any similar systems
- Each profile can be independently replaced to change its message
- Wall, door, suspended, projecting, desk mounted or freestanding fixings
- The system incorporates a hidden, tamper-proof locking device
- No special maintenance required

SOLUTIONS
Due to the highly adaptable nature of the MSS, it has been specified extensively for corporate and government headquarters, colleges, universities, museums, libraries, art facilities, sport centers, healthcare institutions, and law courts.

WINDOW INSERTS

Each acrylic window includes a selected profile for either partitions or added to a modular system (displayed on previous page). MSS Window Inserts can accommodate a single-sided or double-sided MSS bracket and can be manufactured to fit any sized insert with standard paper sizes or custom sizes upon request.

NOTEBAR INSERT

Length: Custom sizing available up to 10 feet.
Thickness: 0.43” (11mm)

Our MSS Notebars are perfect for all paper insert needs including: schedules, agendas, name tags, and hanging artwork.
