

## **COOLNOMIX® Warranty**

Agile8 Consulting Limited ("Agile8") warrants that **COOLNOMIX®** Energy Optimization units are free of defects in components and assembly and are fit-for-purpose for saving energy and costs when properly retro-fitted on air-conditioning and refrigeration systems that are correctly sized for their environment and which are properly maintained. In the event of any failure of a **COOLNOMIX®** unit within three years from the date of purchase, the failed unit will be replaced free-of-charge by Agile8, subject to the conditions stated below.

### Conditions of Warranty

**COOLNOMIX®** branding must not be removed from the product. Agile8 permits co-branding by authorized distributors only.

**COOLNOMIX®** must be fitted by a qualified technician and the warranty shall not extend to defects or failure brought about by abuse, misuse, modification, alteration or improper installation or otherwise by events outside the control of Agile8 that render **COOLNOMIX®** unfit for purpose.

Agile8 will not be responsible for consequential economic damages nor for the failure of any additional parts that are used in the fitting of **COOLNOMIX®** and which are not supplied by Agile8.

There are no serviceable parts in **COOLNOMIX®** units which are sealed using ultrasonic welding for safety reasons. This sealed body must not be opened. In the event this sealed body is opened, the warranty is void. Any defective **COOLNOMIX®** unit must be returned to Agile8 for inspection.

Note that cutting **COOLNOMIX®** temperature sensor wires to extend their reach does not invalidate this warranty provided that the unit has been correctly fitted.

Agile8 shall not be liable for the costs of removal or replacement of faulty units.
