

In 1 hour, Cut your electricity costs by 8%.

COOLNOMIX® increases the energy efficiency of refrigeration and air conditioning systems by an average of 30%, delivering a rapid payback.

Extend the life of your system, reduce irregular maintenance, and enjoy more comfortable cooling. This add-on device is a simple way to achieve sustainability goals, reduce operating expenses, and improve the quality of system performance.

Boost Performance

No one likes temperature swings. With dual sensors, COOLNOMIX® provides your system with more accurate temperature control, offering customers a more comfortable banking experience.

Save Energy

Using smart software and predictive analysis, each device optimizes compressor operation so that your system only runs when it needs to. Cut your carbon footprint while improving performance.

Save Money

Why continue to waste 30% of the money you are spending on HVAC/R energy costs? Even on the newest systems, COOLNOMIX® delivers. No maintenance and no infrastructure changes. Just set up and save.
