## Project, Walk-in Refrigeration

Energy Awareness CO2 (EACO2) installed a COOLNOMIX® unit in a walk-in refrigerator in an Outback Steakhouse. To achieve direct comparison, the trial included COOLNOMIX® unit in bypass as well as in operation.

Restaurant	Baseline	COOLNOMIX®	Energy Saved	
Refrigeration	84.67 kWh	53.35 kWh	31.32 kWh	37%

## Conclusion

The validation test found that installing COOLNOMIX® made the refrigeration unit more efficient without having any effect on temperature.
