

Energy Savings: 41.8%

Administered by: Agile8 Consulting Limited

Project - AC

Agile8 Consulting Limited installed COOLNOMIX® on two 18,000 BTU Daikin air-conditioning units. This validation ran for three days on comparable unoccupied apartments. In one apartment two COOLNOMIX® systems were in operation. The other acted as a baseline operating without COOLNOMIX®. The trial ran again using occupied apartments.

Hospitality	Baseline	COOLNOMIX®	Energy Saved	
Two AC Units	23.88 kWh	13.90 kWh	9.98 kWh	41.8%

Conclusion

With COOLNOMIX® installed, the cooling system was significantly more energy efficient while keeping room temperature stable.
