

Energy Savings: 58%

Administered by: Energy Savings Lanka

Restaurant - Air Conditioning

Energy Savings Lanka with Domino's Pizza installed a COOLNOMIX® unit on a 12,000 BTU Fujair wall-mounted air conditioner in the Manager's office at a Domino's location in Sri Lanka. Using an Efergy meter to monitor power consumption, this trial ran for four days with COOLNOMIX® in bypass and three days with COOLNOMIX® in operation.

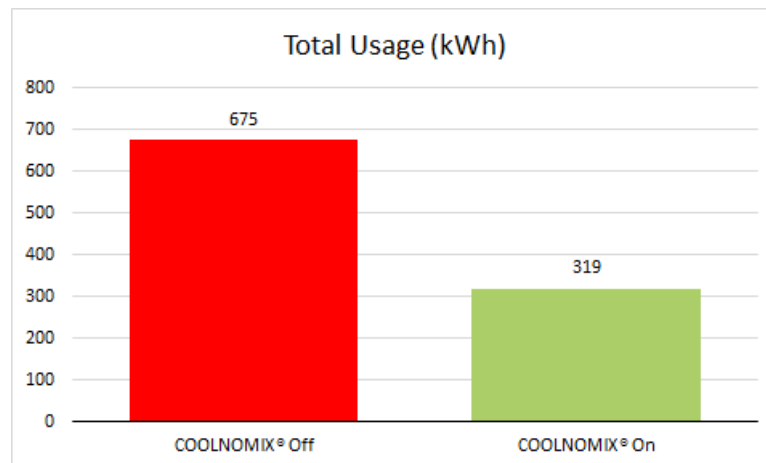

Installation	Baseline	COOLNOMIX®	Energy Saved	
AC Unit	.675 kW / hour	.319 kW / hour	.212 kW / hour	58%

Conclusion

COOLNOMIX® reduced energy consumption significantly while maintaining a comfortable office environment. See http://www.esli.lk/customer_results.php for results from many more COOLNOMIX® projects in partnership with Energy Savings Lanka.
