

# Energy Savings: 24%

Administered by: Save Energy Jaya PT

**JW MARRIOTT**<sup>®</sup>

## Walk-in Refrigeration

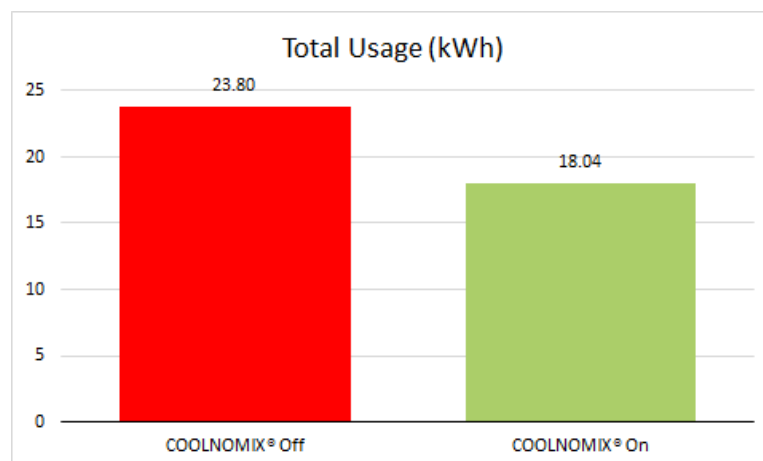

Save Energy Jaya PT installed a COOLNOMIX<sup>®</sup> unit on a walk-in cooler at a JW Marriott hotel in Surabaya, Indonesia. Baseline energy readings were taken for seven days. COOLNOMIX<sup>®</sup> was then engaged for seven days and energy performance was compared.

Installation	Baseline	COOLNOMIX <sup>®</sup>	Energy Saved	
Refrigeration	23.8 kWh/day	18.0 kWh/day	5.8 kWh/day	24%

## Conclusion

The walk-in cooling system was more efficient and kept temperature more consistent with COOLNOMIX<sup>®</sup>. The 24% savings was achieved on a system that runs 24/7/365. If extrapolated to a year, kWh reductions would be greater than 2,000 kWh with savings over \$400.
