

All Things Need Water

All living things need water.

People need water.

We drink water and wash
ourselves with water. We play
in water.

Birds need water.
Birds like eagles and ducks
are living things that need
water. Birds drink water
and wash themselves with
water.

Reptiles need water.

Reptiles like turtles, alligators, and snakes are living things that need water.

Reptiles drink water, cool off in water, and swim in water.

Invertebrates need water.

Invertebrates like sea stars, jellyfish, and crabs are living things that need water.

Invertebrates live and breath in water.

Mammals need water.

Mammals like river otters and skunks need water.

Mammals drink water, swim in water, and bathe in water.

Fish need water.

Fish like trout, sharks, and stingrays need water.

Fish live and breath in water and look for food in water.

The aquarium has many tanks filled with water.

Some tanks have saltwater and some tanks have freshwater.

Each tank is designed to be a perfect home for the animals in it.

Aquarium Workers keep the tanks just right for every animal.

As you explore the aquarium, you will see lots of water and living things in
water!
